LUXURY BRAND MARKETING

BRAND OVERVIEW

Founded in 1957 in Toronto, Canada.

Originally designed clothing for Arctic workers and explorers before becoming a global fashion brand.

Sells jackets, clothing, footwear, and accessories through its stores, website, and selected retailers.

Known for making high-quality luxury winter Jackets and outerwear.

Combines style, warmth, and durability, making its products popular worldwide.

Focuses on premium quality, strong branding, and increasing sustainability efforts.

SIGNALS AND RECOMMENDATIONS

SHIFT IN TRAVEL DESTINATION

- Summer travel to traditional hotspots is declining
- Cooler destinations are seeing a rapid growth (25% shoulder-season bookings)

(Global Travel Collection, 2026; Ultra luxury escapes ..., 2026)

- Affluent travellers are choosing Greenland, Iceland, and Arctic Norway
- Cold environments aree becoming the new luxury escape
- Consumers are buying confidence in climate stability

CLIMATE ESCAPE LUXURY

- Combine adaptive apparel, Arctic experiences & consierge services
- Build an exclusive community through private clubs and expeditions
- Connect customers to Canada Goose’s environmental mission and conservation efforst

REDIFINING LUXURY AND WHAT IT MEANS

Young consumers are rewriting luxury rules

- From opulence/ excess/ conspicuous consumption to decisions that feel intentional.
- Second hand market = $360 Billion in 2030 (3x the growth rate of first hand luxury).
- Pre-owned pieces carry meaning + stories.
- Sustainability = new status symbol.
- 66% of adults now thrift regularly, and 28% of Gen Z thrift on a weekly basis

THE PRESTIGE OF PRE-OWNED FASHION GARMENTS

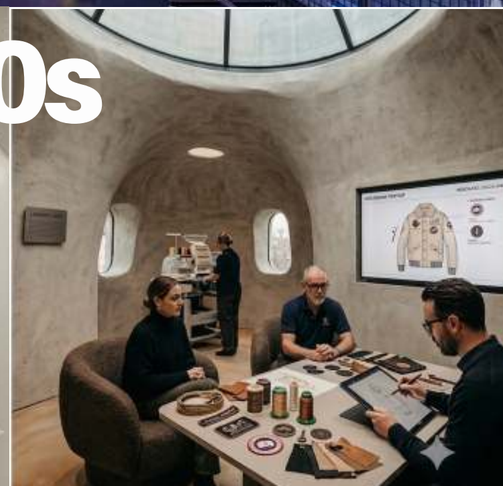

Time Traveling in the Brand's Universe through In-Store Experience

SIGNAL - SMART LUXURY: CONSUMERS POSITION MEANING BEYOND OWNERSHIP

- Luxury is no longer about status it is about innovation,performance and longevity
- Smart materials are transforming products into intelligent and long-lasting investments
- Canada Goose can redefine luxury by combining technology,craftsmanship and immersive experiences,

CLIMATE CONTROL BUTTON

- A simple button able to switch between Heat, Cooling or Auto-Adjusting Mode with one touch
- Clothes made with Smart materials like Aerogel,Graphene and PCM for auto temperature regulation
- Helping people adapt to increasingly unpredictable weather and extreme temperature with the climate change

CLIMATE EXPERIENCE CENTER

- Testing products in real wind, rain, extreme heat and cold conditions.
- Experience the technology before making a purchase.
- Build trust through live performance demonstrations.
- Transforming retail into an immersive luxury experience.

THE 2036'S OBJECTIVES

PERSONA 1 — THE BRAND INHERITOR

James, 38 · Notting Hill, London

Strategy Consulting Partner · £200,000/year

His Story: Bought his first Canada Goose parka in 2019. Repaired twice. Never replaced. He does not follow trends — he invests in things built to last.

Relationship with Canada Goose: Lifetime warranty customer. Active on the Generations resale platform. Just joined the Arctic Access Club for a Svalbard expedition.
His Frustration: Brands that talk about sustainability without hard evidence.

Why Canada Goose: Because they prove everything — repairability, traceability, and a real Arctic connection.
Core Emotions: Trust · Resilience · Legacy

PERSONA 2 — THE EXPERIENCE SEEKER

Amara, 29 · Shoreditch, London

Founder, Sustainable Tech Startup · £120,000/year

Her Story: Never owned Canada Goose before 2034. Joined the Arctic Access Club first — bought the parka after, because she needed it for her first Arctic expedition.

Relationship with Canada Goose: Sees Canada Goose as a gateway to the world's last wild places, not as a fashion brand.
Her Frustration: Luxury brands that sell a dream without real world impact.

Why Canada Goose: Because it gives her access to something money alone cannot buy.
Core Emotions: Purpose · Transformation · Belonging

CUSTOMER PERSONAS

CUSTOMER JOURNEY MAP

AWARENESS

James — Arctic documentary. No influencer. Just proof.
Amara — Discovers Arctic Access Club. "The last luxury before it disappears."
Curiosity · Intrigue

CONSIDERATION

London flagship visit. Cold Room experience.
QR code — full supply chain traceability.
Trust · Desire

EXPERIENCE

James — 7-day Svalbard Arctic expedition.
Amara — Churchill conservation project.
Private community. No social media.
Belonging · Transformation

PURCHASE

James trades in his 2019 parka via Generations.
Amara buys her first parka for her Arctic expedition.
Both receive a Digital Product Passport.
Pride · Purpose

LOYALTY

James — 3rd free repair. Never needs a new one.
Amara — "The only brand that takes you somewhere that matters."
Advocacy · Long-term relationship

ROAD MAP

(2027-2036)

2027 - 2028

Circular Expansion

2029 - 2032

Adaptive Climate Tech

2033 - 2036

Experience Ecosystem

WHY GENERATIONS?

3×

Faster growth of luxury resale vs. primary market

1st-Party

Brand reclaims authentication & margin from resellers

Retention

Traded up for near-term new-unit demand

PHASE CHANGE MATERIALS

Auto-regulates body temperature

AEROGEL

Ultra-light insulating cooling barrier

GRAPHENE

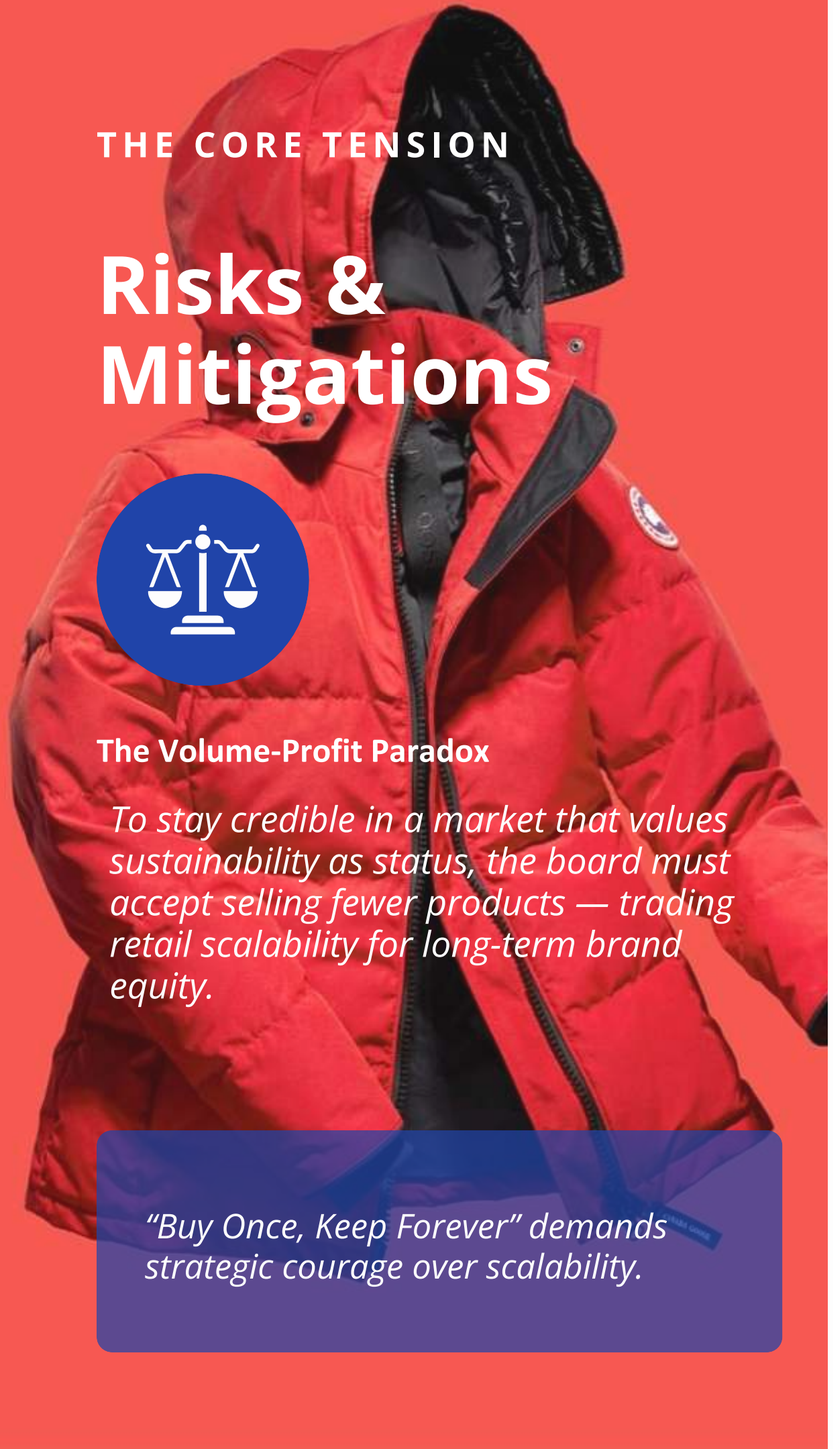

Rapid, efficient active heating layer

01 **Digital Product Passports**

02 **Lifetime Care Programme**

03 **Climate Experience Centres**

04 **Arctic Access Club**

THE CORE TENSION

Risks & Mitigations

The Volume-Profit Paradox

To stay credible in a market that values sustainability as status, the board must accept selling fewer products — trading retail scalability for long-term brand equity.

"Buy Once, Keep Forever" demands strategic courage over scalability.

RISK	MITIGATION
Volume-Profit Paradox Selling fewer products challenges retail scalability.	**Offset with high-margin memberships, tech upgrades & repair services.**
Cannibalization & Brand Dilution Resale expansion risks diluting exclusivity and inviting counterfeits.	**Brand-governed authentication, Rolex-style CPO; resale complements full-price sales.**
Tech Failure & "Tech-Wash" Perception Sensors may fail in extreme conditions or read as gimmicky.	**Frame as resilience tool; Digital Product Passports add transparency.**
Traceability & Emissions Gaps **Tier 2/3 traceability incomplete; Scope 3 emissions remain high.**	**Scale TrusTrace to 100% traceability; design for full circularity.**
Dependence on Extreme Weather Sales remain tied to cold-weather demand.	**Pivot to "Confidence in Every Climate" with adaptive, year-round lines.**

**“We do not sell you a jacket.
We sell you a relationship with the last wild places on Earth.”**

**Canada Goose in 2036 isn't a jacket brand.
It's an access immersive experience brand.**

LUXURY BRAND MARKETING

CANADA GOOSE · FUTURE STRATEGY · LUXURY BRAND MANAGEMENT

Customer Personas 2036

PERSONA 01

James — The Brand Inheritor

James,38 · Notting Hill, London

Strategy Consulting Partner · £200,000/year

His Story

I purchased my first Canada Goose parka in 2019. It has been repaired twice but has never been replaced.

He does not follow trends; instead, he invests in things that are built to last.

Relationship with Canada Goose

Lifetime warranty customer. Active on the Generations resale platform.

I recently became a member of the Arctic Access Club to participate in a Svalbard expedition.

His Frustration

Brands That Discuss Sustainability Without Hard Evidence

Why Canada Goose

Because they demonstrate everything—repairability, traceability, and a genuine Arctic experience.

Core Emotions

Trust	Resilience	Legacy

PERSONA 02

Amara — The Experience Seeker

Amara,29 · Shoreditch, London

Founder, Sustainable Tech Startup · £120,000 per year

Her Story
Never owned Canada Goose before 2034. I joined the Arctic Access Club first — bought the parka after, because she needed it for her first Arctic expedition.

Relationship with Canada Goose
Sees Canada Goose as a gateway to the world's last wild places, not as a fashion brand.

Her Frustration
Luxury brands that sell a dream without real-world impact.

Why Canada Goose
Because it gives her access to something money alone cannot buy.

Core Emotions

Purpose	Transformation	Belonging

Two Personas. One Arctic Standard.

James and Amara represent the two pillars of Canada Goose's 2036 strategy — heritage and access. Both demand authenticity. Both reject empty luxury. Both choose Canada Goose not for what it signals, but for what it does.

James invests in legacy

Repairability, traceability, and a brand that stands behind its promise for decades.

Amara invests in experience

Access to the Arctic, real-world impact, and a community that shares her values.

Both demand proof

Sustainability claims must be evidenced. Luxury must mean something beyond aesthetics.

THE EXPERIENCE 2036

THE ARCTIC EMBASSY

The Store

Climate Room · Digital Product Passport · Repair & Care Bar · No seasonal collections · New technologies

ARCTIC ACCESS CLUB

The Experience

Max 12 people · Two tiers : Explorer & Expedition · Real conservation impact · Invitation only

THE DIGITAL PASSPORT

The Platform

Generations resale · Private community · AI lifetime tracking · Full traceability

We do not sell you a jacket. We sell you a relationship with the last wild places on Earth."

SYSTEM ONE COAT

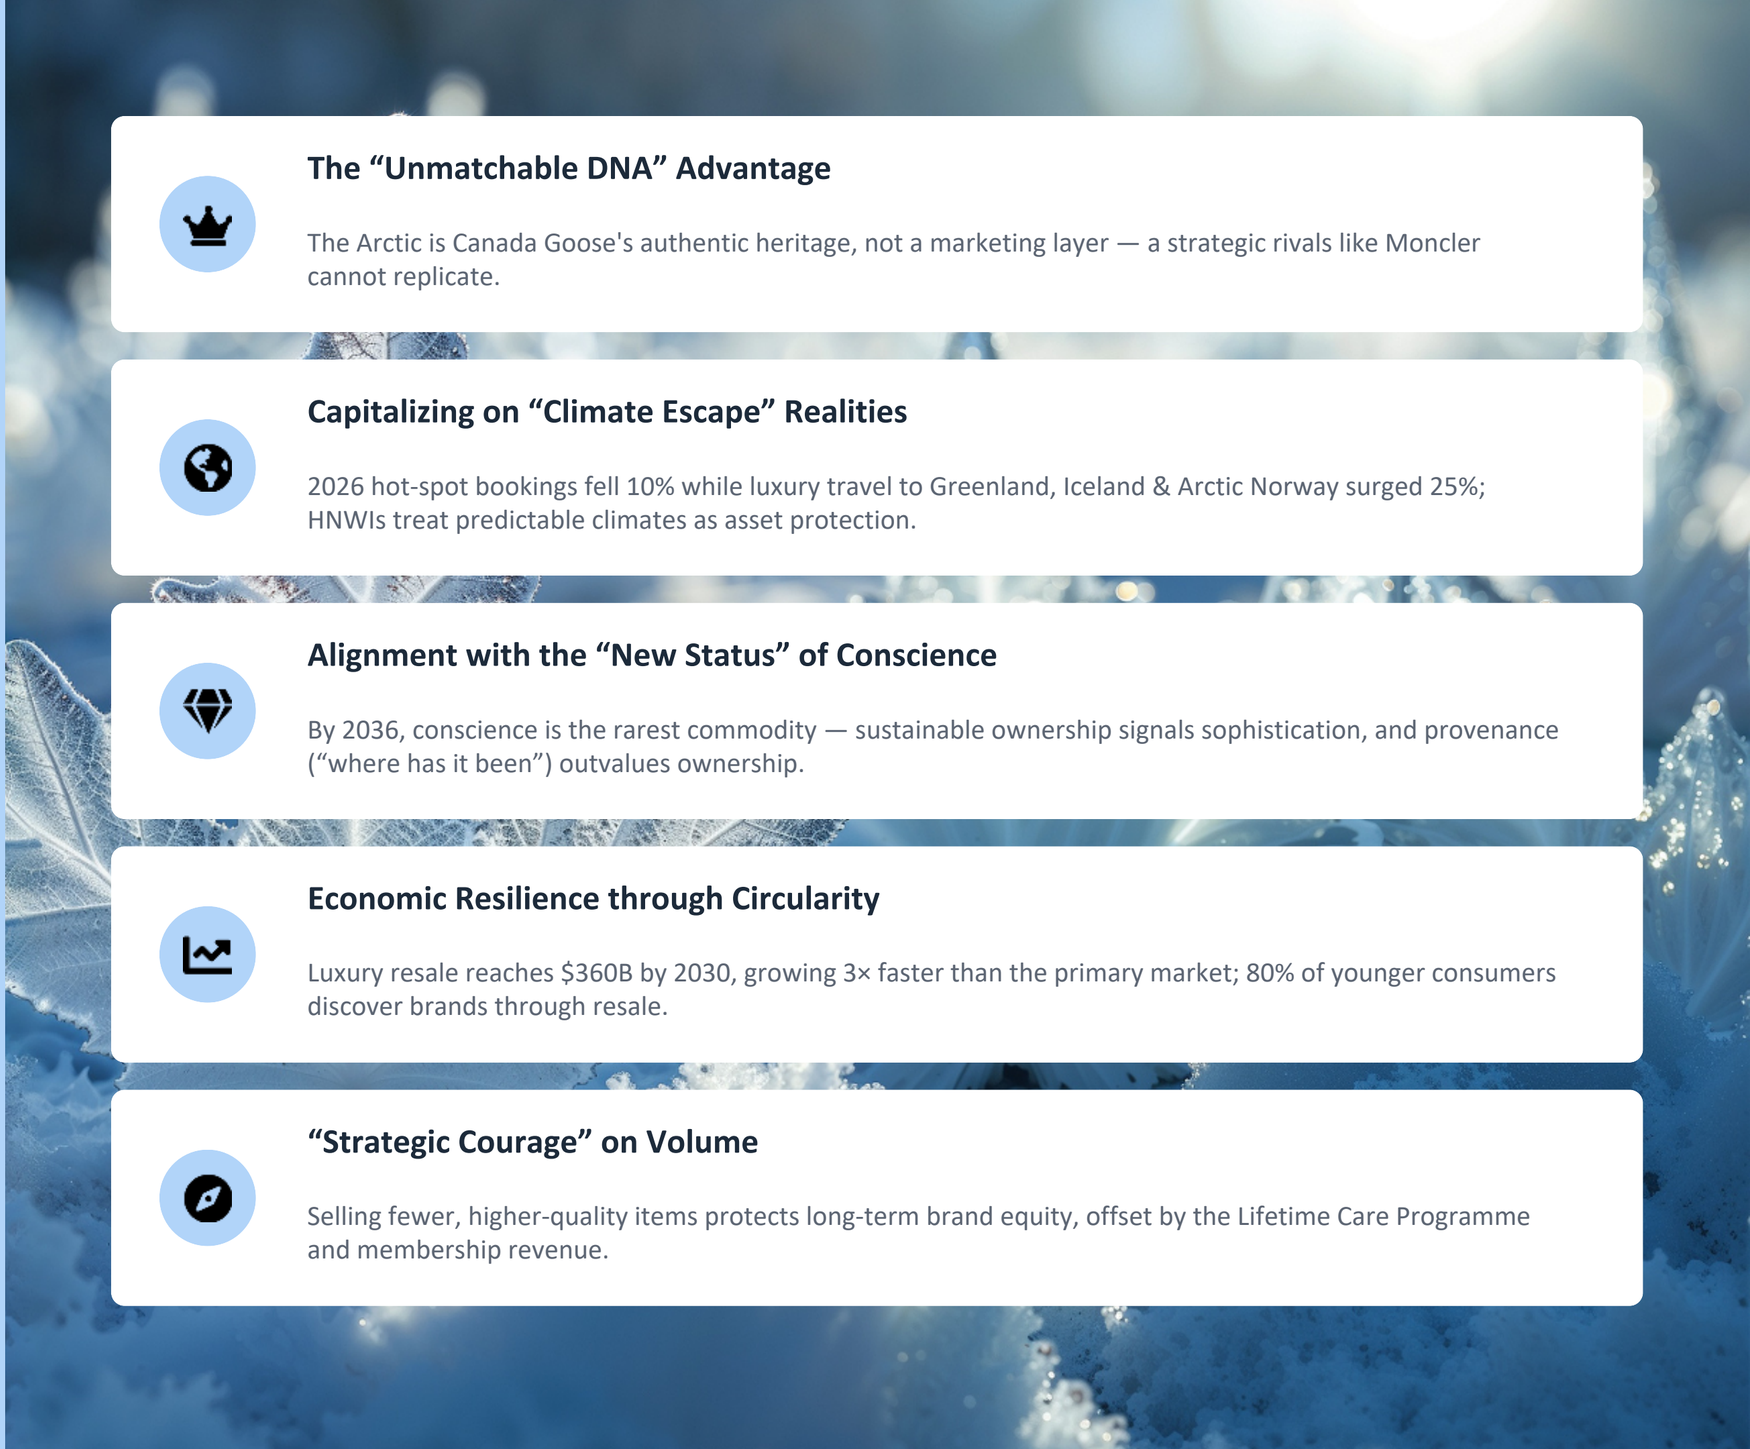

THE WINNING ARGUMENT

Why This Works

“Depth is the edge.”

Going deep on Climate Escape Luxury means Canada Goose isn't selling a jacket — it's defining the destination and delivering confidence in every climate.

No other luxury house can sell this credibly — the Arctic is Canada Goose's original territory.

The “Unmatchable DNA” Advantage

The Arctic is Canada Goose's authentic heritage, not a marketing layer — a strategic rivals like Moncler cannot replicate.

Capitalizing on “Climate Escape” Realities

2026 hot-spot bookings fell 10% while luxury travel to Greenland, Iceland & Arctic Norway surged 25%; HNWIs treat predictable climates as asset protection.

Alignment with the “New Status” of Conscience

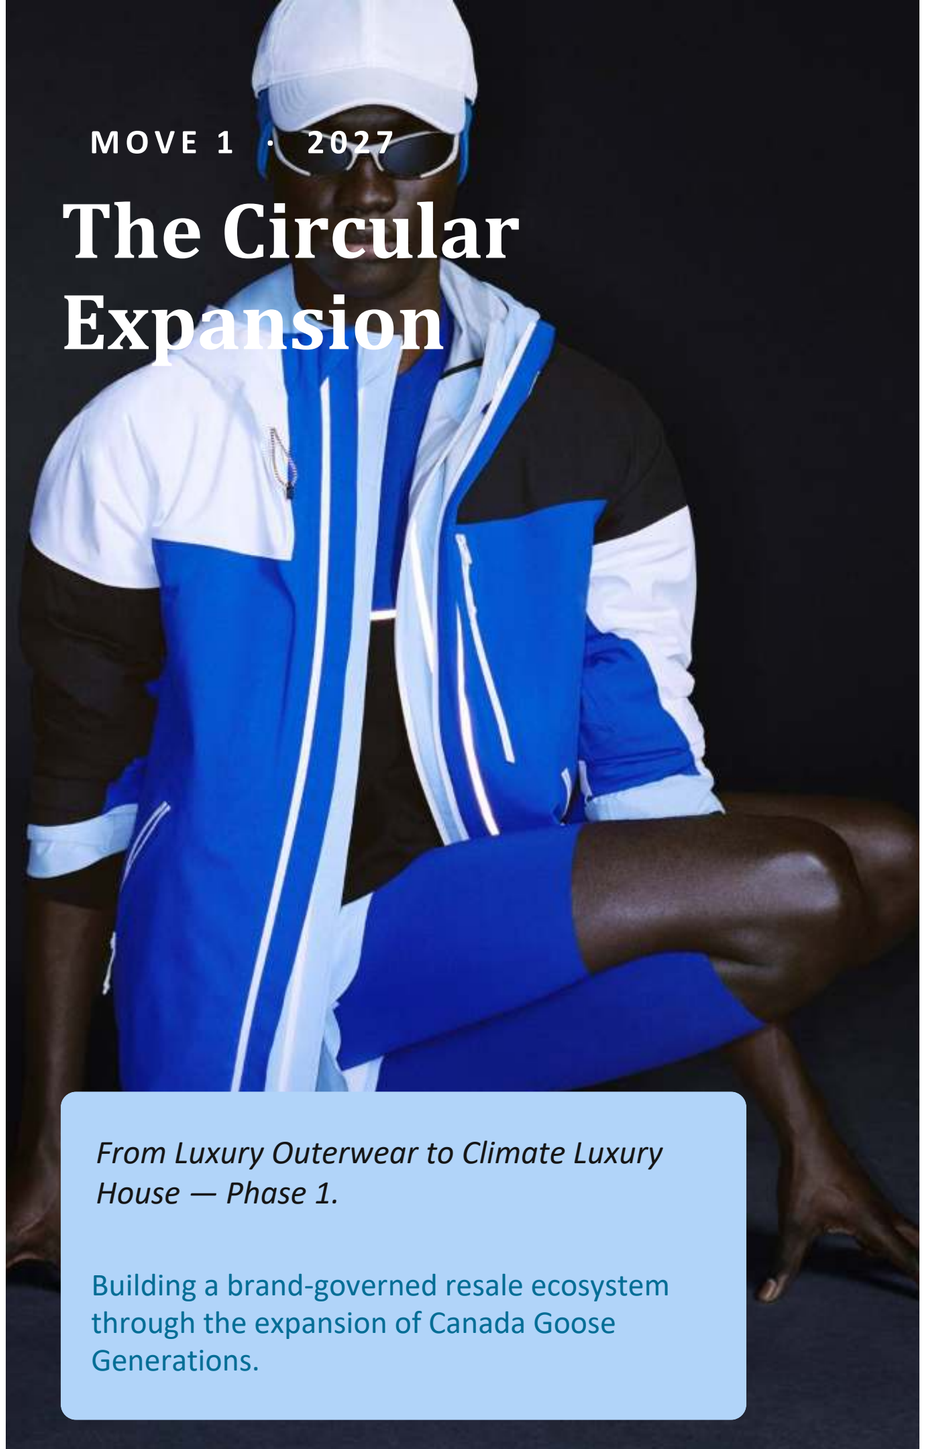

By 2036, conscience is the rarest commodity — sustainable ownership signals sophistication, and provenance (“where has it been”) outvalues ownership.

Economic Resilience through Circularity

Luxury resale reaches $360B by 2030, growing 3× faster than the primary market; 80% of younger consumers discover brands through resale.

“Strategic Courage” on Volume

Selling fewer, higher-quality items protects long-term brand equity, offset by the Lifetime Care Programme and membership revenue.

MOVE 1 · 2027

The Circular Expansion

From Luxury Outerwear to Climate Luxury House — Phase 1.

Building a brand-governed resale ecosystem through the expansion of Canada Goose Generations.

THE MOVE

Fully integrate trade-in and resale of authenticated vintage pieces into the official digital and physical store experience.

RATIONALE

Luxury resale is growing at 3× the rate of the primary market. Internalizing it reclaims the ecosystem from third-party platforms and aligns with the rising status of “conscience over consumption.”

STRATEGIC TENSION

Leadership must accept potentially lower demand for brand-new product in exchange for higher customer retention and a stronger sustainability profile.

WHY GENERATIONS, WHY NOW

3×

Faster growth of luxury resale vs. primary market

1st-Party

Brand reclaims authentication & margin from resellers

Retention

Traded up for near-term new-unit demand

MOVE 2 · 2029

Adaptive Climate Control™

BRAND SIGNAL

"Winterwear" → "Confidence in Every Climate"

From passive outerwear to active climate management.

THE MOVE

Introduce Climate Control — patented smart textiles (graphene, aerogel, phase change materials) with discreet controls to switch between heating and cooling, letting a single jacket replace an entire seasonal wardrobe.

GRAPHENE

Rapid, efficient active heating layer

AEROGEL

Ultra-light insulating cooling barrier

PHASE CHANGE MATERIALS

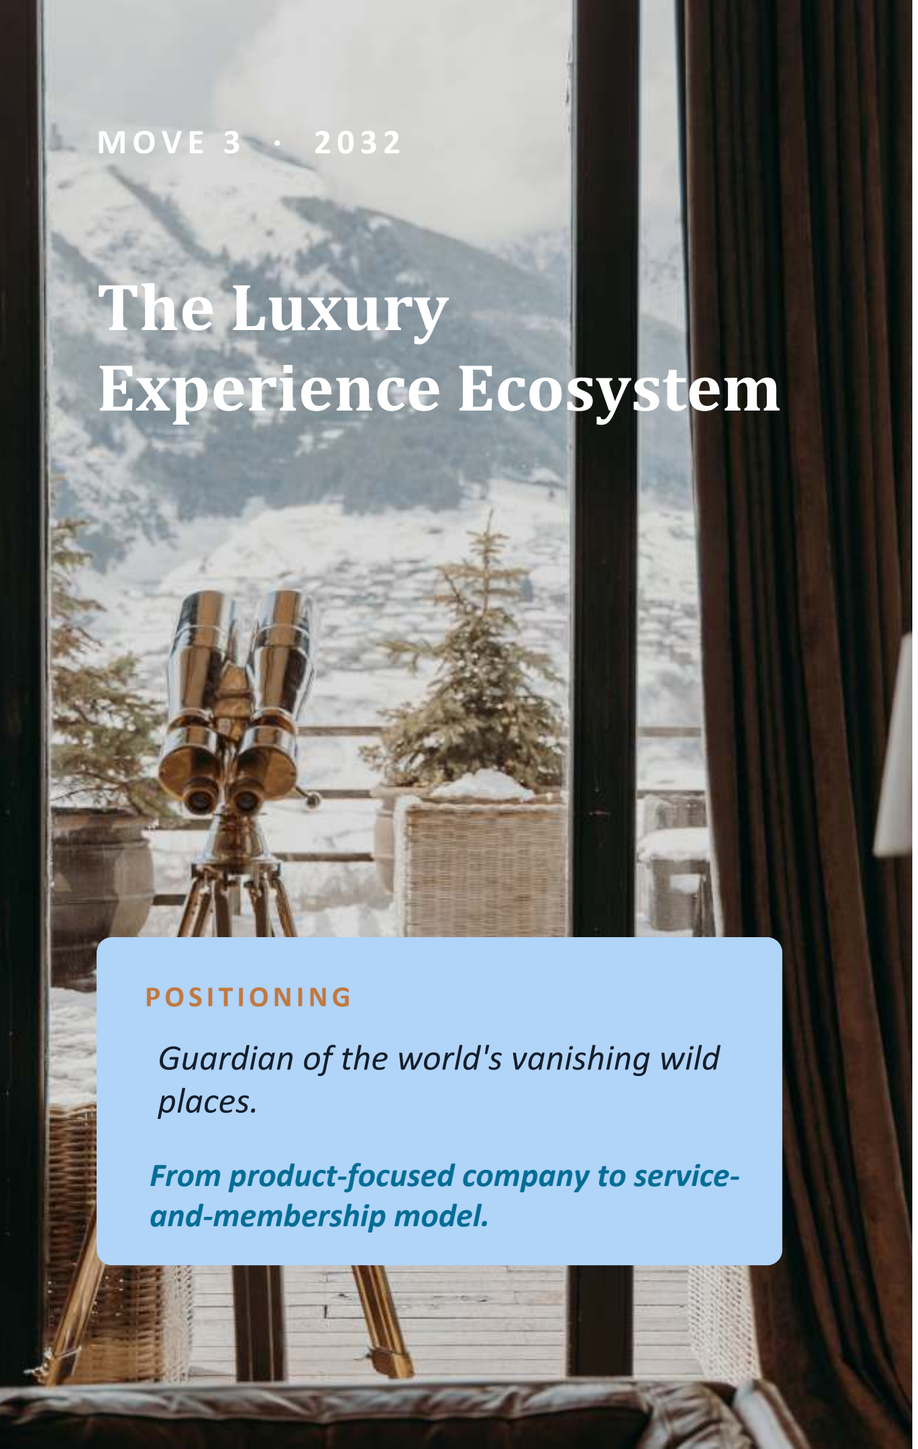

Auto-regulates body temperature

RATIONALE

As climate patterns grow more unpredictable — sudden cold snaps and heatwaves — customers will pay for one intelligent piece that delivers confidence in every climate, rather than a full seasonal wardrobe.

STRATEGIC TENSION

NASA-derived thermal materials (e.g. Trizar) are already deployed by brands like O'Neill in extreme ski wear — Canada Goose must differentiate its patented approach or risk following, not leading, the category.

MOVE 3 · 2032

The Luxury Experience Ecosystem

POSITIONING

Guardian of the world's vanishing wild places.

From product-focused company to service-and-membership model.

FOUR KEY INNOVATIONS

The final pivot bundles product, service, and membership into one integrated luxury ecosystem.

01 Digital Product Passports

Blockchain-verified provenance, repair logs, and ownership journey — turning wear and tear into a narrative asset.

02 Lifetime Care Programme

Premium membership for annual maintenance and tech upgrades (e.g. new sensors), so a jacket lasts for decades.

03 Climate Experience Centres

Retail replaced by immersive environments where customers test products in simulated extreme rain, snow, and wind.

04 Arctic Access Club

Most loyal customers gain access to climate-stability sanctuaries and polar expeditions.
