• Your organisation and customer type
retail(ikea): in-store shopping with a first time customer

• Your Emotion Curve with numbered points and labels

• Your biggest dip, moment of truth, and new peak
Our biggest dip is the long checkout queue and waiting time
Cause: not enough open tills and slow checkout process, leading to frustration after shopping.

Our moment of truth is having product availability and easy self-service warehouse pickup
Customers quickly find items and feel satisfied with efficiency.

Our new peak is having friendly staff helps carry items + fast delivery option offered
Creates a positive surprise and improves overall experiene

• Your 3 improvement actions (owner + metric for each)

1. Reduce the biggest dip (prevention)

- **Action:** Open additional self-checkout stations during peak hours
- **Owner:** Store Operations Manager
- **Metric:** Average checkout waiting time

2. Improve service recovery

- **Action:** Offer instant queue compensation (e.g., £5 voucher if wait >10 min)
- **Owner:** Customer Experience Team
- **Metric:** Customer satisfaction score after checkout

3. Create a new peak (delight)

- **Action:** Staff proactively offer help loading items or delivery discount
- **Owner:** Floor Staff Supervisor
- **Metric:** Delivery add-on rate / positive feedback scores
