WHERE MORNING SMILES

Marketing Metrics & Analytics

Team 1: Zachary SPIERS | Valentine DONSIMONI | Beatrice MOLLER | Hrithika PATALAY

Every Bake Tells a Story of Tradition, Craft and Care

A Modern Bakery

"A modern bakery shaped by craft, community and contemporary London." From artisanal pastries and bread to signature sandwiches, FRED caters to every treat.

The Roots of FRED

Founded in London (2021), FRED is the sister brand to the Italian eatery Faros.
The name stems from "Fresh" and "Baked," reflecting a philosophy of purposeful, daily craft.

Digital Presence

Active on Instagram & TikTok
Clean, minimalist website design
Focus on community shared experiences

Minimalist Marketing

Eschewing "loud" advertising, FRED relies on word-of-mouth and highly "instagrammable" locations to drive organic growth.

The Approach

Objective:

Student Segment Competition & Expansion

Attitudinal & Brand Perception

- Direct consumer motivations & brand sentiment
- Lifestyle alignment with FRED's aesthetic
- Why FRED over local premium competitors

First-Party Behavioral Data

Scrutinised social media data analysis across platforms:

Behavioral & Transactional Metrics - Quantitative

- Purchase frequency & average spend (£)
- Preferred visit times
- Footfall conversion rate (passers-by vs. entrants)

Synthesising Qual & Quant - Audience Segmentation

- Cross-tabbed insights → clear segments
- Daily buyers vs. weekend visitors
- Student value separated from core audience
- Focus on acquisition & repeat velocity

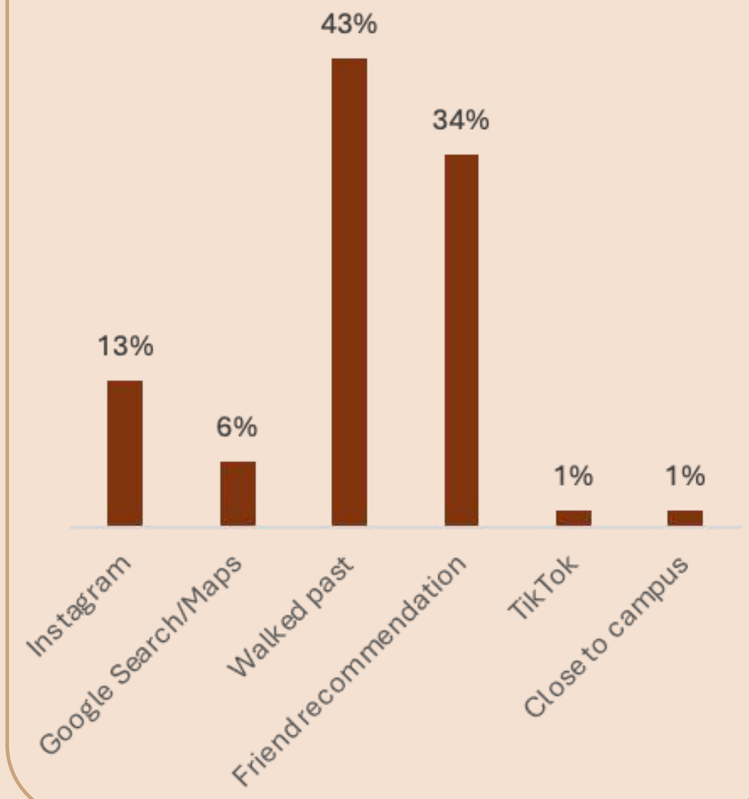

Key Findings

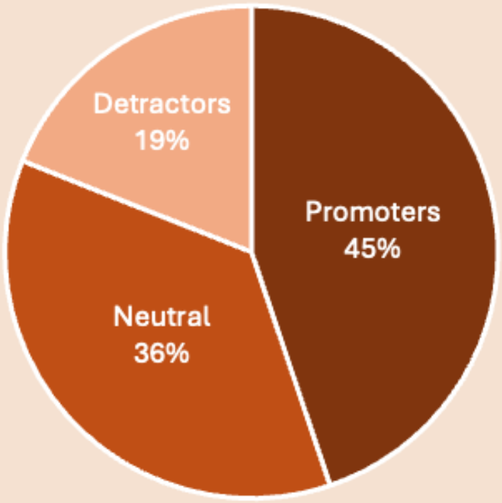

Analysis and Strategic recommendations for future growth

Surveys insights

All: How did you hear about this shop?

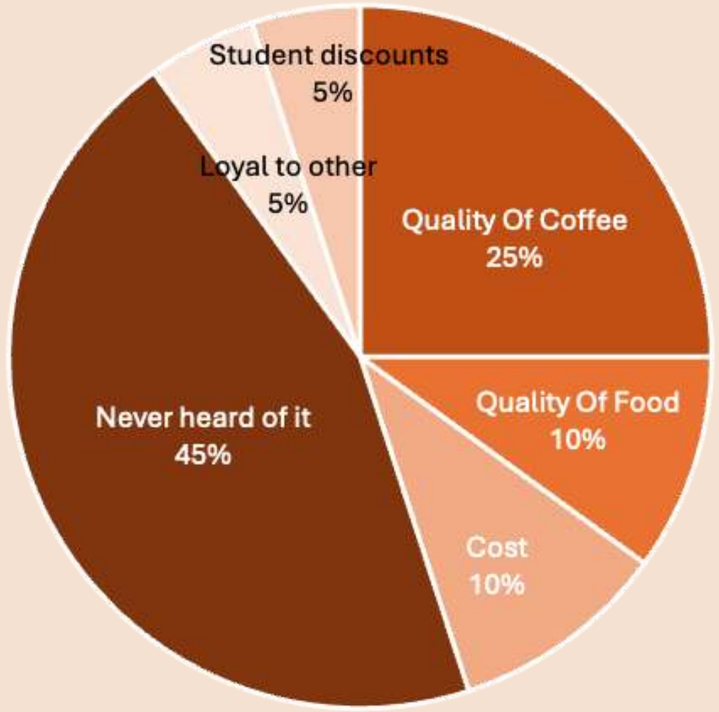

All: How Likely are you to recommend Freds to a friend?

2.14 Instagram Engagement Rate

40.2 TikTok Engagement Rate

Students: Why haven't you been?

Loyalty Issues

Direct Competitors

Indirect Competitors

Ana's

BLANK STREET

GAIL's

CAFFÈ NERO

ORGANIC COFFEE
PRET
FRESHLY MADE FOOD

Recommendations

How should Fred capture data going forward?

- Visit frequency
- Average spend
- Product preferences

Method:

- App
- Stamp card
- Partnership with Hult
- Samples
- Discount cards
- Orientation week deal

And how do we measure success?

- Rising student NPS
- Repeat visit rate
- Average spend per student

Take Aways

Strategic recommendations for future growth:

Fred doesn't have a product problem. It has a belonging problem.

Students on its doorstep don't know it exists.

At Hult, most students stay one year. The window is short.

Fred needs to be the first choice before the default is set.

Use what works at Oxford Circus to make Holborn known.

The engagement is proven. Now point it at the right audience.

The product is ready. The audience is ready. Now make them find each other.

Three things to do next.

To capture students before they default.

1

Make Holborn visible

A board outside. Pastries in the window. Something that says: we are here.

2

Create trackabale touchpoint for Holborn students

OC socials don't speak to this campus. Make it theirs. Use Proposed Loyalty Program

3

Get there before others do

Most Hult students stay one year. Capture the habit early or lose it entirely.

Limitations

Honest gaps in our data

What we couldn't control

BENCHMARKING BOUNDARY

Oxford biased data

Findings generalised to Oxford Circus and not Holborn.

COLLABORATION LIMITATION

Website chat & catering enquiries broken

Live chat non-functional · No reply received to our collaboration request

DATA INFRASTRUCTURE

No loyalty programme

No first-party customer data available · GA4 & UTM tracking absent

SAMPLE SIZE

69 total responses

51 students + 18 customers · skewed toward university cohort

IF WE HAD MORE TIME & RESOURCES

Time of day

AM vs PM customer behaviour differs

Weekday vs weekend

Footfall patterns differ significantly

Weather & seasons

Strikes, holidays, rain all affect results

Surveyor & wording

Different interviewers + phrasing bias responses

Collaborate directly with Fred for internal data

To unlock internal customer data, a critical gap currently limiting retention and long-term marketing strategy.

Regression Analysis

To identify which behavioural and psychological factors drive students' shop choice, enabling more targeted marketing.

THANK

YOU

41 responses

Copy chart

Student Survey pt.2

Why do you choose Fred's shop over competitors?

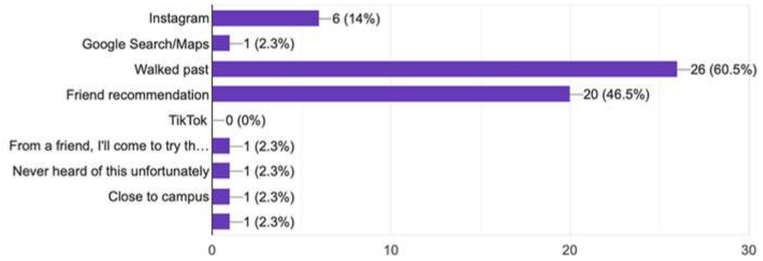

30 responses

- Quality
- The location and cost of coffee
- price
- Good quality ingredients, independent shop
- Not a big chain and people are super friendly
- I don't, I feel like there are better coffee shops (better quality) at a more accessible price around campus. Also not the best place to study at, too crowded at times, not enough space to work.

How did you hear about this shop?
