S W

O T

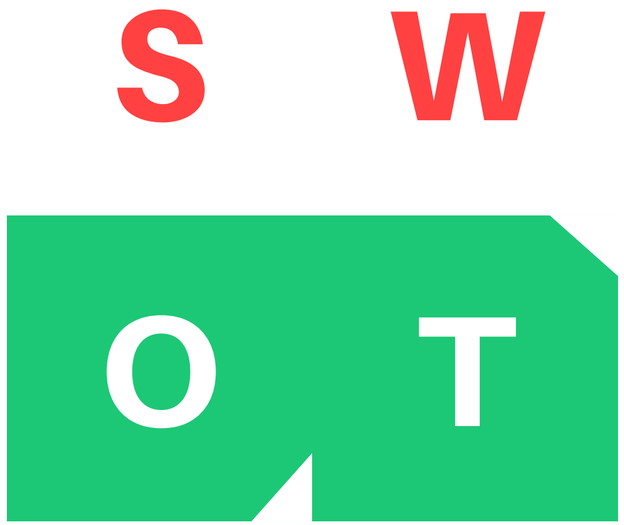

WEAKNESSES

- Free plan: only 2 users, no automations, no Calendar
- **30-person** team costs ~**$4,320/year** seats in blocks of 5
- Enterprise bugs & unresponsive support reported
- Ad overload damaging brand perception
- Mobile app widely described as clumsy.
- 7% workforce subject to military mobilisation

G2 (2026), Capterra (2025), Trustpilot (2026), Gartner (2024), Ekşi Sözlük (n.d.), and SEC Filings (2025).

OPPORTUNITIES

- Monday AI targets growing enterprise demand for intelligent, agentic automation
- Monday CRM positioned **40–60%** cheaper than comparable Pipedrive setups strong SMB appeal
- Hybrid & remote work growing total addressable market
- Enterprise tier unlocks 250,000+ automation actions/month + dedicated Customer Success Managers

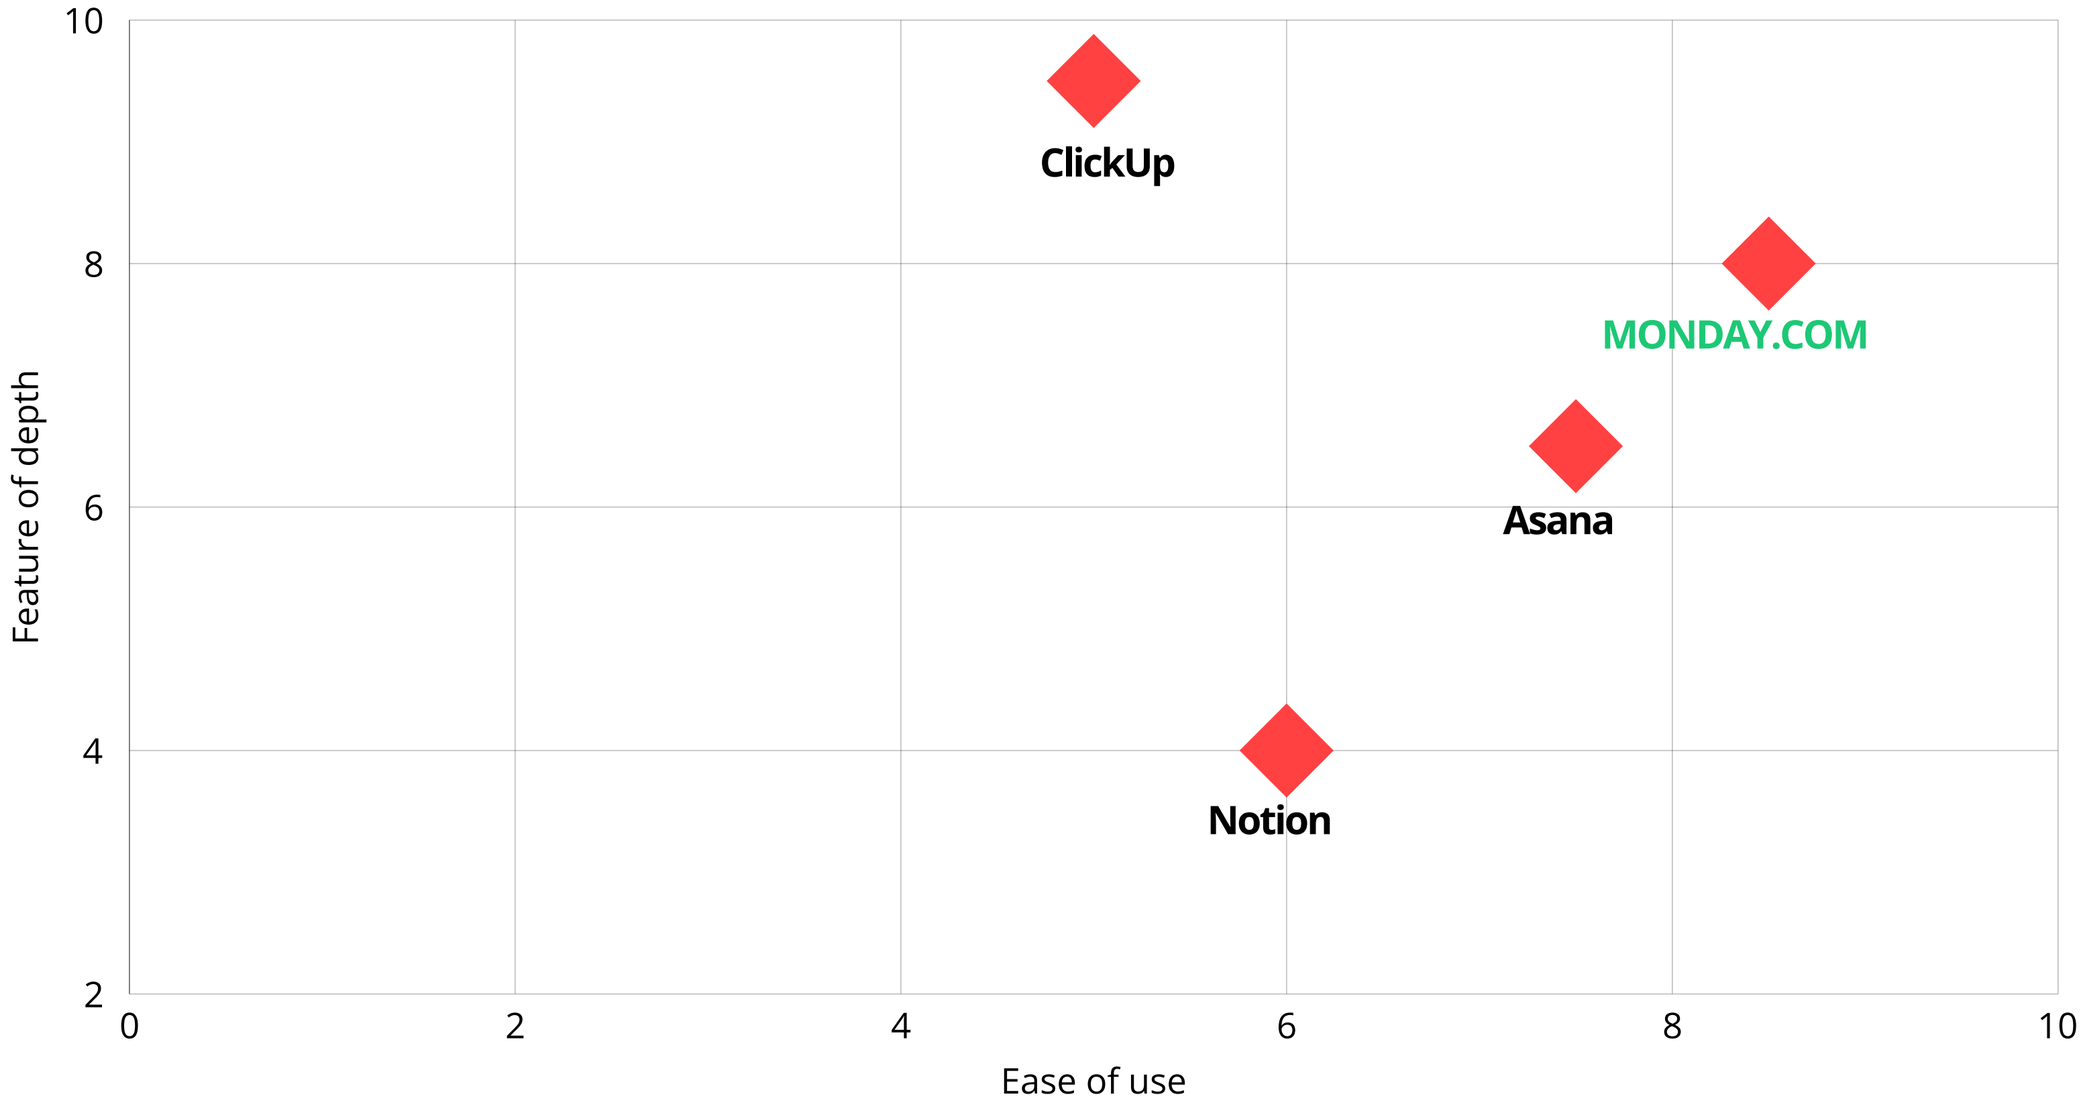

THREATS

- ClickUp AI, Notion AI & Microsoft Copilot compete with AI-native architectures often no add-on cost
- Pipedrive still outperforms monday.com for pure sales pipeline teams.
- Asana, ClickUp AI, Notion AI & Microsoft Copilot compete with AI-native architectures often no add-on cost
- Bug complaints + ad saturation risk eroding enterprise credibility

REAL-WORLD BUSINESS EXAMPLE

NovaBrand Agency

THE SCENARIO

NovaBrand is a mid-sized marketing agency with 45 staff across 4 departments:

Creative, Digital, Client Services & Operations

PROBLEMS BEFORE MONDAY.COM:

- Missed deadlines on 3 client campaigns per quarter
- Teams working across 6+ disconnected tools (email, Slack, Drive, Trello)
- No real-time visibility on project status for managers
- Onboarding new freelancers took 2 weeks on average

MONDAY.COM SOLUTION

- 1 unified workspace for all 4 departments
- Automated campaign deadline reminders via Gantt + Calendar sync
- Client boards shared with external stakeholders (view-only access)
- Freelancer onboarding checklist template reduces ramp-up to 2 days
- Real-time dashboard showing all active campaigns, budgets & statuses

RESULTS AFTER 3 MONTHS:

- Deadline misses reduced by 78%
- Team reported 40% less time on status update meetings

HOW NOVABRAND USED MONDAY.COM

MEASURABLE IMPACT AT NOVABRAND

78%

Reduction in missed deadlines

40%

Less time on status update meetings

2 days

Freelancer onboarding (down from 2 weeks)

Why Monday.com Was Effective for NovaBrand

- All-in-one platform eliminated tool fragmentation — from 6 tools down to 1
- Visual Gantt charts gave project managers instant campaign timelines without training
- Automated alerts replaced manual follow-ups, freeing team capacity for creative work

Progress: 1/10

STEP 1

Create a Free Account

Visit monday.com and sign up — no credit card required. Takes under 2 minutes.

1. Go to monday.com and click 'Get Started Free'
2. Enter your work email address and create a password
3. Check your inbox and click the verification link
4. Choose your role (e.g. Project Manager, Marketing) to personalise setup

PRO TIP: Use your work email, not a personal one. This unlocks company domain matching, which means when a teammate signs up using the same email domain, Monday.com automatically suggests your workspace for them to join, no manual invite needed. It saves time from day one and keeps your workspace professional.

STEP 2

2

of 10

Set Up Your Workspace

Your workspace is your organisation's home — give it a name and invite your team.

1. Name your workspace (e.g. 'NovaBrand Marketing HQ')
2. Choose your industry for tailored template suggestions
3. Set your team size so Monday.com configures the right plan
4. Click 'Create Workspace' to proceed to your dashboard

PRO TIP: Keep your workspace name short and recognisable. This keeps teams, boards, and data completely siloed from one another, which is especially important for confidentiality when working with different clients.

Progress: 2/10

STEP 3

3

of 10

Create Your First Board

A board is your central project space. Choose a template or start from scratch.

1. Click the '+' button in the left sidebar and select 'New Board'
2. Choose 'Use a Template' (e.g. 'Campaign Management') OR 'Start from Scratch'
3. Name your board (e.g. 'Q2 Campaign Tracker')
4. Select 'Main Table' view as your starting layout

PRO TIP: Templates come pre-loaded with the most useful column types for your use case dates, status labels, person assignments and save you at least 30 minutes of setup time.

Progress: 3/10

STEP 4

4

of 10

Add Groups and Tasks

Groups organise your tasks by phase, department or campaign. Tasks are individual work items.

1. Click '+ Add new group' and name it (e.g. 'In Progress', 'To Do', 'Done')
2. Within each group, click '+ Add item' to create a task
3. Type the task name (e.g. 'Design social media banner')
4. Hit Enter to save repeat for all project tasks

PRO TIP: Colour-code your groups from the very start. Click the small coloured dot next to any group name and assign it a distinct colour. Once you switch to Kanban view, these colours make your board instantly scannable. You'll be able to see the health of an entire project in one glance without reading a single task name.

Progress: 4/10

STEP 5

5

of 10

Assign Team Members

Invite colleagues and assign them to specific tasks so everyone knows their role.

1. Click 'Invite / Manage' at the top right to add team members by email
2. On each task row, click the 'Person' column and select a team member
3. Assign multiple owners if a task is collaborative
4. Team members get an email notification about their assigned tasks

PRO TIP: Resist the temptation to assign every unstarted task to yourself as a temporary placeholder. Unassigned tasks are completely fine in fact, they signal to the whole team that a task is available and open for someone to claim. This creates a culture of ownership rather than top-down task distribution, which research consistently shows leads to higher engagement and faster completion rates in collaborative teams.

Progress: 5/10

STEP 6

Set Deadlines & Status

6

of 10

Deadlines keep your team on track. Status columns give instant visual progress signals.

1. Click a task's 'Date' column and pick a due date from the calendar
2. Click the 'Status' column — choose: Working on it (yellow), Done (green), Stuck (red)
3. Colour-coding is automatic — red items are immediately visible to managers
4. Add priority (Critical / High / Medium / Low) for workload sorting

PRO TIP: Build a "buffer deadline" habit from the beginning. Set the deadline inside Monday.com two days earlier than your actual client-facing deadline.

Progress: 6/10

STEP 7

7

of 10

Switch to Gantt / Calendar View

Change how you see your board — Gantt charts show project timelines visually.

1. At the top of your board, click '+ Add View'
2. Select 'Gantt' to see tasks plotted against a timeline
3. Drag task bars to reschedule them without editing individually
4. Use 'Calendar View' to see deadlines in a monthly/weekly format

PRO TIP: Once you are in Gantt view, use the "Connect dependent tasks" feature. Link a task to its predecessor, so that if you drag and reschedule the first task, all tasks that depend on it shift forward automatically. For any project with more than five sequential tasks, this feature alone justifies the tool.

Progress: 7/10

STEP 8

8

of 10

Set Up Automations

Automations eliminate repetitive work — no coding required. Use Monday.com's recipe builder.

1. Click 'Automate' in the top toolbar of your board
2. Browse featured recipes (e.g. 'When deadline arrives, notify owner')
3. Customise: choose trigger (When) → condition (If) → action (Then)
4. Click 'Add to Board' — automation is now active and running 24/7

PRO TIP: Start with exactly one automation: "When a status changes to Stuck, notify the board owner." This single recipe immediately surfaces blockers that would otherwise go unnoticed until a deadline is missed.

Progress: 8/10

STEP 9

9

of 10

Add Integrations

Connect Monday.com to your existing tools — Slack, Google Drive, Zoom, and 500+ more.

1. Click your profile icon (top right) → go to 'Integrations Centre'
2. Search for your tool (e.g. 'Slack') and click 'Connect'
3. Authorise the connection using your Slack / Google credentials
4. Set your integration action (e.g. 'Post to Slack when task is Done')

PRO TIP: If your team uses Slack, connect it first — it delivers the highest immediate impact of any integration. Set it to post a message in a dedicated Slack channel whenever a task status changes to "Done.

Progress: 9/10

STEP 10

10

of 10

Share with Clients & Export Reports

Give stakeholders controlled access or download professional status reports.

1. Click 'Share' → invite external users as 'Guest' (view-only, no editing)
2. Use 'Dashboard' view to build a summary widget showing all project KPIs
3. Click 'Export' → download as Excel or PDF for client presentations
4. Guests see only what you share — your internal data stays private

PRO TIP: Before inviting any client into Monday.com, create a dedicated board specifically for them — one that only shows completed work, approved deliverables, and current status. Never share your internal working board directly.
