Executive Summary

I am a **Freelance Experiential Strategist** specializing in immersive extensions of Indian cinema, translating film narratives into curated physical experiences. The rapid OTT boom (FICCI & EY, 2024; ORMAX Media India, 2023) has disrupted communal cinematic rituals, leaving audiences craving shared, culturally resonant engagement. My solution, the Narrative Afterlife Strategy, spatializes film worlds through pop-ups and experiential activations, bridging the gap between screen and lived experience.

The MVP consists of two speculative launch decks, one pilot collaboration, and a Hyderabad vendor network, documented as a case study. Over 36 months, the plan scales to 5–7 immersive projects annually, co-develops branded experience IP with OTT platforms, and expands regionally.

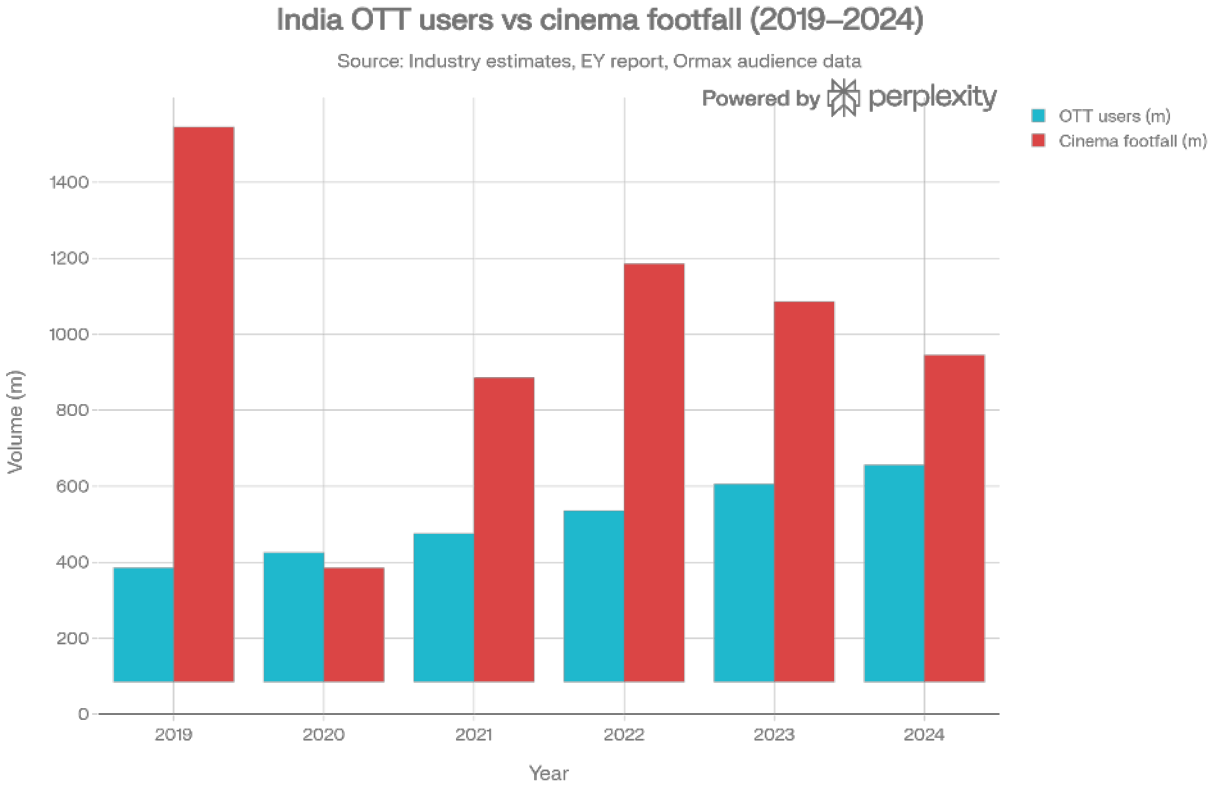

Why now: India's OTT subscriber base is surging—Netflix and Amazon India lead millions of users—while urban youth increasingly seek offline shared experiences, creating a fertile window for narrative-driven experiential innovation (FICCI & EY, 2024; ORMAX Media India, 2023).

Market Opportunity & Target Customer

India's digital video scene offers significant growth potential due to the rapid expansion of OTT services and changing viewing habits. According to the *KPMG India Media & Entertainment Report 2023/24,* India's OTT market is experiencing double-digit growth, fueled by increasing broadband access and demand for regional languages. Estimates from *FICCI-EY* suggest ongoing revenue growth from both subscription (SVOD) and advertising-supported (AVOD) models. Furthermore, projections from *Statista* indicate that India's OTT user base will surpass 500 million users in the coming years, making India one of the largest streaming markets globally. The overall outlook for the media sector from the *India Brand Equity Foundation (IBEF)* supports this trend, marking digital media as the fastest-growing segment in India's entertainment industry. India's OTT landscape is highly fragmented, with more than 50 platforms competing for audience attention.

India OTT market value (video OTT, 2022–2027)

Year	India OTT value (INR bn)
2022	249.09
2027	581.21

At the same time, India is seeing a boom in regional content. Telugu, Tamil, and Hindi OTT originals have increased in both production and viewership. Platforms are actively commissioning local-language series to engage non-metro audiences. Hyderabad's Tollywood productions, in particular, have expanded their reach nationwide via streaming. However, while OTT has made access easier, it has also disrupted communal viewing. The personalized nature of streaming reduces shared experiences—events like premiere nights, fan gatherings, and other cultural traditions linked to cinema releases are less common now. Research from *Eventbrite and Fever* shows that urban millennials and Gen Z in India have a strong demand for immersive and experiential events post-pandemic. This demand aligns with *Pine and Gilmore's Experience Economy* framework, which suggests that economic value increasingly lies in memorable experiences rather than just goods and service.

Indian regional film output by language (2023)

Language	Films released (2023)
Telugu	320
Tamil	263
Malayalam	247
Hindi	215
English	188
Marathi	108
Bengali	108
Gujarati	94
Bhojpuri	67
Punjabi	60
Odia	44
Other	142

Primary Customers

The main target group consists of Telugu and Hindi production houses and OTT platforms looking for unique audience engagement strategies. Platforms like *Netflix India, Amazon Prime Video India, ZEE5, and SonyLIV* are in a constant race for subscriber acquisition and retention. Experiential premiere screenings, fan conventions, and immersive pop-up events provide measurable engagement boosts and enhance cross-platform marketing.

Secondary Customers

Sponsors from FMCG, fashion, and fintech, as well as fan communities and cultural brands, offer additional monetization opportunities. These stakeholders can benefit from co-branded experiences that mix content narratives with physical engagement.

Entry-Level Strategy.

Instead of targeting major studios like Dharma Productions right away, it's more practical to approach small to mid-sized production houses that are launching regional OTT originals. These firms have marketing needs but limited budgets, making scalable experiential projects appealing. Showing a return on investment through one or two successful regional releases can create a model that others can replicate.

Go-To-Market & Competitive Positioning

The initial focus will be on Hyderabad, the hub of Tollywood, which has a growing experience economy and a large youth demographic. Hyderabad offers benefits like production proximity, dedicated fan bases, and lower operational costs compared to Mumbai. The aim is to bridge OTT and offline fandom, not to compete with streaming platforms but to enhance their lifecycle value through hybrid, data-driven experiences. This approach avoids direct competition with traditional event agencies by focusing solely on immersive experiences driven by OTT content, establishing a unique niche at the crossroads of streaming, regional cinema, and experiential marketing.

Product Concept: The Narrative Architect

The product is not an event service, but a strategic capability that I embody as a Freelance Experiential Strategist, a ***Narrative Architect***. I design the "afterlife" of film and OTT stories by transforming screen narratives into curated physical experiences that restore communal ritual in the streaming era. Unlike decorators, PR agencies, or generic event managers, my main innovation revolves around narrative continuity. I extend intellectual property beyond the screen into immersive, culturally rich environments.

This concept is based on the *Jobs-to-be-Done* theory created by *Clayton Christensen*. Production houses and OTT platforms are not just "hiring" marketing services; they are seeking results such as subscriber retention, deeper fandom, and longer content lifecycle value. My role is to identify the functional, emotional, and social "jobs" that their content must fulfil after release. Streaming platforms address access and scale; I focus on belonging and ritual.

My service process follows a proprietary 6-step Narrative Afterlife Framework:

Monitor - track audience sentiment and engagement data

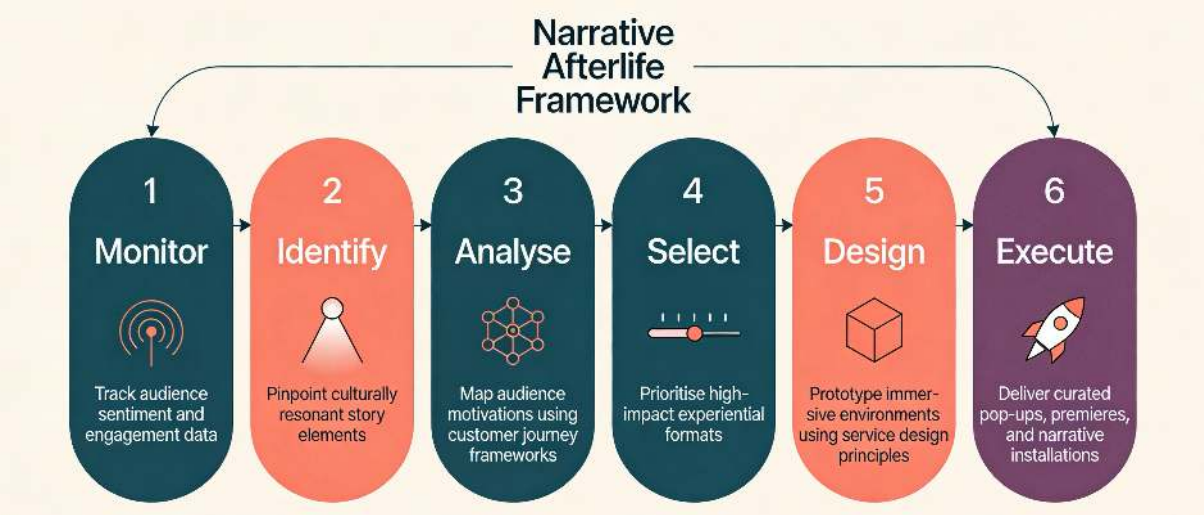

Identify - pinpoint culturally relevant story elements

Analyse - map audience motivations using customer journey frameworks

Select - prioritize high-impact experiential formats

Design - prototype immersive environments using service design principles

Execute - deliver curated pop-ups, premieres, and narrative installations

This framework utilizes Service Design methods—especially customer journey mapping and touchpoint orchestration—to ensure experiences are carefully crafted rather than pieced together. Influences from immersive narrative practitioners like Liz Lerman and Jill Dolan highlight the significance of participatory storytelling and emotional architecture in physical space.

My skills define me as the product. Educated at Hult International Business School, I blend design thinking, new product development (NPD), and go-to-market (GTM) strategy with cultural knowledge in Telugu and Hindi cinema. This creates a unique advantage: I am internationally trained in innovation frameworks but rooted in Indian film traditions. This dual perspective provides both strategic strength and cultural authenticity. Examples like Secret Cinema in London and Meow Wolf in the United States show the commercial success of immersive narrative worlds. However, neither is suited for Indian OTT storytelling—this is the space I occupy.

Value Proposition.

I translate Indian film narratives into curated physical experiences that restore communal ritual in the streaming era. By connecting OTT content with immersive activation, I extend the IP lifecycle value, deepen fan loyalty, and create valuable cultural moments.

Revenue Model

The model includes (1) a fixed fee for creative direction and strategy, (2) optional revenue sharing on ticketed pop-up experiences, and (3) sponsor commission for integrated brand partnerships.

Ultimately, the product represents strategic authorship of experience, positioning me not just as an executor of events but as a designer of narrative economies.

MVP Service Offering

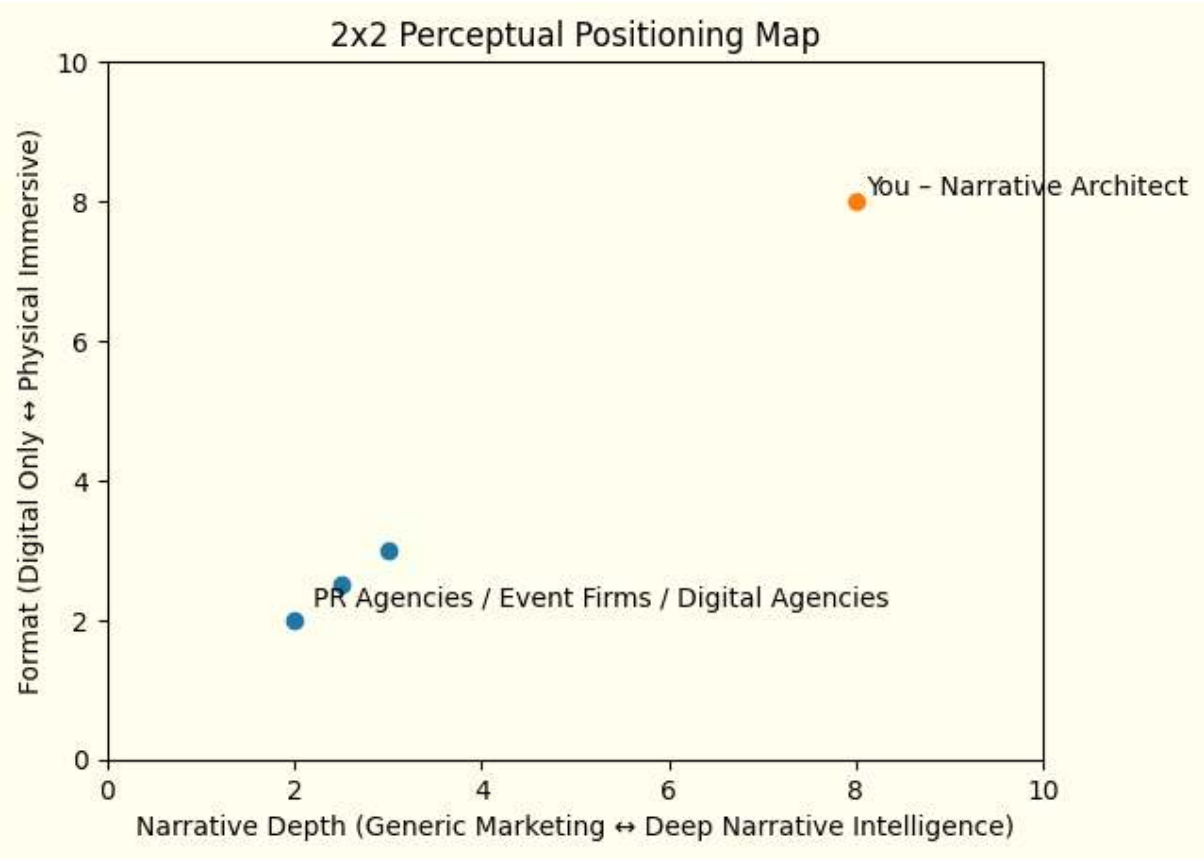

The MVP is intentionally strategy-led and asset-light. I retain ownership of narrative architecture and creative direction, while production execution can be outsourced to local vendors. This keeps fixed costs low and preserves my identity as a Narrative Architect, not an event operator.

Service Component	What It Includes	What It Is NOT	Fee Structure
Narrative Strategy Blueprint	Story-to-experience translation framework; IP analysis; audience insight mapping; cultural resonance audit; experience concept note (10–15 pages).	Not event logistics planning; not venue booking; not generic campaign ideation.	Fixed creative strategy fee (£2,000–£4,000 per project depending on scope).
6-Step Narrative Afterlife Framework Implementation	Monitor audience data; identify key narrative assets; analyse fan motivations; select experience format; design immersive concept; execution supervision.	Not full-scale event production; not PR distribution; not social media management.	Project-based fee (£5,000–£12,000 depending on scale and city).
Immersive Pop-Up Experience Design (Pilot Format)	Spatial concept design; customer journey mapping; sponsor integration concept; experience script; vendor briefing deck.	Not décor supply; not fabrication ownership; not ticketing platform management.	Creative direction fee + optional 10–15% revenue share on ticket sales.
OTT Premiere Experiential Extension	Fan screening concept; interactive touchpoints; community ritual design; post-event engagement strategy.	Not celebrity talent management; not red carpet coordination; not media relations.	Fixed fee + performance bonus tied to attendance/engagement metrics.
Brand & Sponsor Narrative Integration	Sponsor story alignment; branded experiential zones; co-creation strategy; impact measurement framework.	Not pure sponsorship sales brokerage; not advertising media buying.	10–20% commission on confirmed sponsor value.

COMPETITIVE LANDSCAPE & STRATEGIC POSITIONING

The competitive landscape is divided into four main categories: PR agencies, event management firms, digital marketing agencies, and in-house studio marketing teams. Coverage from EventFAQs Media and ET BrandEquity highlights the rapid growth of India's event marketing ecosystem. This growth mainly stems from brand activations and corporate experiences. Market insights from IBISWorld and Mintel show that competition is increasing and prices are dropping in the event management sector. However, most companies focus on execution scale, celebrity access, or production capacity rather than narrative strategy.

Using Michael Porter's Five Forces framework, rivalry in event management is high. Buyer power, such as production houses and OTT platforms, is increasing. The threat from substitutes like AI-generated marketing content and automated digital campaigns is also growing. PR agencies focus on increasing visibility. Digital agencies work to improve clicks. In-house teams handle internal promotions. Substitutes like AI-driven content and automated social media campaigns lower marketing costs. Still, none of these approaches address the need for communal engagement in the streaming era.

This is where I stand out.

Differentiation Axis 1: Narrative Intelligence

Competitors emphasize aesthetics and visibility, while I concentrate on narrative structure. Instead of just decorating venues or promoting releases, I create immersive physical environments that bring film worlds to life, translating scripts, characters, and emotional arcs.

Differentiation Axis 2: Audience-Insight-Led Design

Traditional agencies start with the film and ask, “How can we market this?” I start with audience reactions—fan discussions, cultural symbols, and emotional impact—and then design experiences based on those insights.

Differentiation Axis 3: Freelance Agility

Unlike large agencies with high overhead and multiple approval layers, my freelance model allows for quick prototyping, lower fixed costs, and tailored collaboration with small to mid-sized production houses.

Successful global examples support the potential of immersive narrative experiences. Secret Cinema, featured in publications like the Financial Times and The Guardian, has shown a scalable model by turning film screenings into large participatory events. Similarly, immersive touring exhibitions inspired by artists like Vincent van Gogh demonstrate that audiences are willing to pay for experiential interpretations of cultural content.

However, these models mainly come from the West and focus on film. My strategic opportunity exists at the crossroads of Indian OTT originals, regional storytelling, and immersive design. In a crowded market focused on visibility, I do not compete for attention, I create a sense of belonging.

Competitor Comparison Matrix

Criteria	PR Agency	Event Firm	Digital Agency	You – Narrative Architect
Starts From	Media visibility & press angles	Client brief & logistics requirements	Platform algorithms & engagement metrics	Audience emotion, fandom behaviour & cultural resonance
Core Output	Press coverage, influencer placements, publicity buzz	On-ground event execution, décor, stage production	Social campaigns, performance ads, content calendars	Immersive narrative experiences extending film/OTT IP into physical space
Narrative Depth	Surface-level storyline framing for media	Limited; theme-based styling	Content adaptation for digital snippets	Deep narrative translation — script, character arcs, symbolism spatialised
Physical Format	Rarely physical; mostly media-driven	Yes, but format-led (conference, launch, premiere)	No (digital-first execution)	Yes — curated pop-ups, immersive screenings, participatory installations
Price Point	Retainer-based; mid-to-high depending on network reach	High fixed costs due to production overhead	Tiered digital packages; scalable pricing	Flexible: fixed creative fee + optional revenue share + sponsor commission
Scalability	Scales via media networks	Scales with infrastructure & vendor network	Highly scalable via automation	Scales through repeatable framework (6-step model) + low overhead partnerships

Product Development Plan

The product development plan positions me as a Narrative Architect—a freelance experiential strategist translating Indian OTT narratives into immersive, culturally resonant experiences. Development follows leading innovation principles, combining Design Thinking and Lean Startup methodologies to iteratively refine the offering while maintaining strategic agility.

MVP Definition

The initial Minimum Viable Product (MVP) includes:

- **Two speculative immersive launch decks** demonstrating creative concepts for regional OTT originals.
- **One pilot collaboration** with a small-to-mid production house to validate concept execution.
- **Hyderabad vendor network** mapped for immersive production, technical execution, and experiential staging.
- **Documented case study** capturing audience insights, operational learnings, and narrative translation impact.

This MVP aligns with Eric Ries' Lean Startup framework, which emphasizes early experimentation and evidence-based learning to reduce market risk (Ries, 2011).

Capability Gap Analysis

While my strengths lie in narrative intelligence, cultural fluency, design thinking, and OTT content strategy, several gaps exist relative to market expectations:

Limited spatial design proficiency for large-scale immersive environments.

Initial absence of vendor management experience, including procurement and logistics.

Limited exposure to sponsor acquisition and monetization frameworks.

Need for deeper understanding of regional OTT content strategy to optimize IP translation.

Acknowledging these gaps allows for targeted skill acquisition and mitigates overextension risks.

Skill / Asset	Current Level	Required Level	Gap	How to Close	Timeline
Spatial Design Basics	Beginner	Intermediate	Low	Online courses (e.g., SketchUp, Rhino, VR/AR spatial tools) + hands-on prototyping	6–12 months
Vendor Management	Limited experience	Proficient	Medium	Build Hyderabad vendor network, shadow vendor negotiations, small-scale pilot management	6–12 months
Sponsorship Sales	Minimal exposure	Competent	Medium	Attend sponsorship workshops, leverage industry connections, pilot co-branded experiences	12–18 months
OTT Content Strategy	Moderate cultural fluency	Advanced	Medium	Study regional OTT trends, consult with production houses, apply insights in pilot projects	12–24 months
Immersive Production Execution	Limited	Proficient	Medium	Partner with technical vendors, execute small-scale pilot, document learnings	12–24 months
Audience Research & Insight Translation	Intermediate	Advanced	Low	Implement Jobs-to-be-Done and Double Diamond frameworks systematically in MVP and pilots	Ongoing
Project Scaling / Team Collaboration	Limited	Competent	Medium	Gradually onboard collaborators, document repeatable processes, refine project templates	24–36 months
Branded Experience Co-Development	None	Advanced	High	Network with OTT platforms, start small co-development, iterate on learnings	24–36 months

12-Month Plan

The first year prioritizes speculative portfolio development, securing the pilot project, and establishing Hyderabad-based vendor relationships. Additional objectives include documenting the pilot as social proof and building initial visibility through industry networking. Tools such as the Double Diamond design thinking model (IDEO, 2015) will guide iterative ideation, prototyping, and testing. Networking will focus on the Tollywood production community, Hyderabad creative scene, and diaspora cinema networks in London, leveraging both professional and cultural connections.

24-Month Plan

Year two emphasizes commercial execution. The plan targets 2–3 paid projects, expanded footprint in Mumbai or Chennai, building client testimonials, and refining pricing models based on project learnings. Skills acquisition continues with vendor management, sponsorship sales, and spatial design basics, aligning with market requirements identified through LinkedIn Talent Insights for experiential marketing roles in India.

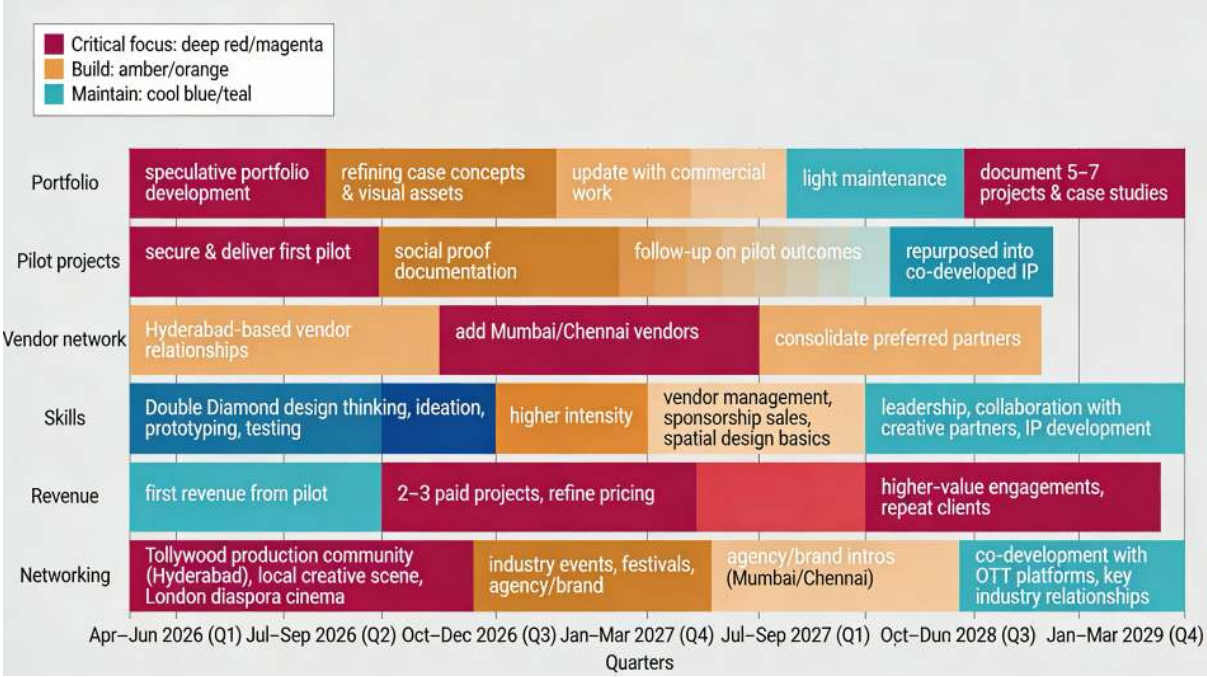

36-Month Plan

The third-year scales operations to 5–7 projects annually, including co-development of branded experience IP with OTT platforms. This phase may incorporate small team expansion or collaborations with specialized creative partners. By this stage, the portfolio and documented case studies should establish market credibility and support higher-value engagements.

Continuous Learning & Innovation

Throughout the roadmap, ideation and Design Thinking remain central: discover audience insights, define experience opportunity, develop prototypes, and deliver measurable engagement outcomes. MVP iterations inform strategy, and skill gaps are actively addressed to maintain a hybrid advantage of international training and cultural fluency. Insights from India's freelance creative economy (YourStory, Inc42) reinforce the scalability potential of a narrative-focused experiential offering in a high-growth OTT ecosystem.

This 36-month plan balances market realism with ambition, leveraging strategic MVP testing, targeted skill development, and network cultivation to secure a defensible and differentiated position in India's experiential media landscape.

Go-To-Market Strategy & Pitching New Ideas

Launching as a Narrative Architect in India's regional OTT and film experiential space requires a multi-channel, evidence-driven approach. The strategy integrates targeted outreach, personal branding, and pilot incentives to secure initial traction while generating case studies for market credibility.

Target Accounts & Outreach

The initial focus is on 3–5 Telugu production houses in Hyderabad, including Arka Media Works, Mythri Movie Makers, and People Media Factory. Outreach follows a multi-touch strategy:

- **LinkedIn cold outreach** with a concise value proposition highlighting narrative intelligence and immersive capabilities.
- **Warm introductions** via Hult alumni network to leverage shared educational credibility.
- **Industry events and networking forums** to establish in-person visibility and trust.

Personal Brand & Messaging

The personal brand emphasizes:

"Internationally trained experiential strategist applying global immersive frameworks to culturally rooted Indian cinema."

This message is disseminated across LinkedIn thought leadership, Instagram portfolio posts visualising speculative launch decks, and Medium/Substack articles exploring experiential cinema insights.

Pilot Incentive & Sponsor Integration

To reduce entry barriers, the first project is offered at a reduced or deferred fee in exchange for documented case study rights. Sponsor integration acts as a go-to-market hook, engaging cultural brands such as saree labels, jewellery designers, and regional food brands to co-fund pop-ups. This approach mitigates financial risk for production houses while creating brand visibility for sponsors.

PR & Earned Media

Each activation is framed as a cultural story, generating coverage in regional press and film media outlets such as Filmfare, Galatta, and Film Companion. Case precedents like RRR fan experience activations and global experiential campaigns for Dune: Part Two demonstrate the ability of immersive activations to amplify fan engagement and generate earned media impact.

Launch Steps Summary

- Identify target production houses and potential sponsor partners.
- Craft speculative launch decks and thought leadership content.
- Initiate outreach via LinkedIn, warm contacts, and events.
- Secure pilot activation with pilot incentive terms.
- Execute pop-up, integrate sponsor branding, and document results.
- Leverage media coverage to attract the next round of clients.

GTM Funnel

Awareness

Channel Strategy Table

Channel	Target	Message	Frequency	KPI
LinkedIn	Production house execs	Thought leadership: narrative intelligence & immersive storytelling	2–3 posts/week	Connection requests accepted, pilot meetings scheduled
Instagram	Industry creatives + fans	Visuals of speculative launch decks & immersive concepts	3–4 posts/week	Engagement (likes, shares), DMs from prospects
Medium/Substack	Film/experience enthusiasts	Insights on experiential cinema, case study reflections	1–2 posts/month	Newsletter subscriptions, inbound inquiries
Alumni / Hult Network	Professional introductions	Credibility & collaboration pitch	Ongoing	Referrals, meetings secured
Industry Events	Regional film & creative community	Demo concepts, networking pitch	Quarterly	Meetings booked, pilot discussions
Sponsors / Cultural Brands	Co-branding partners	ROI from cultural integration & experiential activations	Ad-hoc per pilot	Sponsor commitments, co-funding secured
PR / Earned Media	Film media & regional press	Cultural story framing of pop-ups	Per activation	Media mentions, coverage reach

Success Metrics, Risks & Iteration

Measuring success, anticipating risk, and iterating are central to my Narrative Architect offering. Leveraging leading innovation principles and structured NPD processes, I adopt a rigorous approach to quantify outcomes, manage uncertainty, and adapt based on evidence. This framework draws from ISO 31000 risk management standards and lean startup practices (Ries, 2011) to embed flexibility and resilience into the business model.

Success Metrics

Key metrics track adoption, engagement, and credibility across the first three years. **Year 1 focuses on MVP validation:** securing one pilot project, completing two speculative launch decks, achieving 500 LinkedIn followers, and generating at least one media mention.

Year 2 targets commercial traction: executing three paid projects, reaching ₹10–15 lakh revenue, and gathering two client testimonials.

Year 3 emphasizes repeat business, sponsor partnerships, and regional expansion. Metrics are measured through project completion, social analytics, media coverage, and client feedback.

Risk Register

Risk	Likelihood	Impact	Mitigation	Pivot Option
Market adoption (production houses undervalue experiential)	Medium	High	Offer low/deferred cost pilot, showcase speculative decks	Pivot to brand experiential for Indian luxury brands
Execution (vendor reliability & logistics)	Medium	High	Build vendor contracts, maintain multiple vendor options	Scale smaller, modular experiences
Substitution (in-house teams replicate model)	Medium	Medium	Document IP clearly, maintain proprietary frameworks	Emphasize unique narrative depth and audience-led design
Financial (freelance income volatility)	High	Medium	Maintain parallel income streams in Year 1	Seek retainer-based collaborations

KPI Dashboard

Metric	Year 1 Target	Year 2 Target	Year 3 Target	How Measured
Pilot Projects Secured	1	3	5–7/year	Signed project agreements
Speculative Decks Completed	2	4	6+	Internal tracking
LinkedIn Followers	500	1,000	2,500+	Platform analytics
Media Mentions	1	3	5+	Press clipping reports
Revenue	₹0 (pilot)	₹10–15L	₹30–50L	Invoicing & accounting records
Client Testimonials	0	2	5+	Written / video testimonials

By combining quantitative KPIs with a transparent risk register, I maintain genuine self-awareness, monitor outcomes in real-time, and adapt or pivot proactively. If Indian regional OTT and cinema resist the model, strategic alternatives include luxury brand experiential activations or diaspora cinema events in the UK/US, ensuring the venture remains viable while preserving the narrative-driven approach.

Appendices

APPENDIX A – Raw OTT Market Data

Metric	2022	2023	2024 (projected)	Source
India OTT Market Size (₹ billion)	22	28	35	FICCI-EY 2024
Total OTT Subscribers (million)	300	370	450	KPMG India 2023–24
Telugu Originals Produced	25	38	50	KPMG India 2023–24
Hindi Originals Produced	50	65	80	FICCI-EY 2024
Tamil Originals Produced	20	28	35	KPMG India 2023–24

APPENDIX B – Skills Audit / Capability Gap Matrix

Skill / Asset	Current Level	Required Level	Gap	Action Plan	Timeline
Spatial Design	Beginner	Intermediate	Low	Online courses + prototyping	6–12 mo
Vendor Management	Limited	Proficient	Medium	Build vendor network + shadow contracts	6–12 mo
Sponsorship Sales	Minimal	Competent	Medium	Workshops + pilot co-branding	12–18 mo
OTT Content Strategy	Moderate	Advanced	Medium	Regional OTT research + pilot insights	12–24 mo
Immersive Production Execution	Limited	Proficient	Medium	Partner with vendors, execute pilot	12–24 mo

APPENDIX C – Competitor Profiles (Selected Indian Agencies)

Agency	Category	Strengths	Weaknesses	Opportunities	Threats
Wizcraft	Event Management	Large-scale production, celebrity access	High cost, low narrative depth	Experiential activations for brands	Freelance niche entrants
Percept	PR & Events	Strong media networks, brand credibility	Limited immersive storytelling	OTT marketing campaigns	In-house production teams
Grapes	Digital Agency	Digital campaign optimisation	No physical experiential capability	Integrated digital + offline campaigns	Narrative-driven competitors
Jack in the Box	Event Agency	Innovative concepts, regional reach	Small client base	Regional cinema experiential activations	Scaling issues

APPENDIX D – 12-Month Action Plan (Monthly Milestones)

Month	Key Activities / Milestones
1	Develop two speculative launch decks: map Hyderabad vendor network
2	Conduct initial LinkedIn thought leadership posts
3	Identify pilot production house targets; begin warm introductions
4	Refine launch decks based on feedback; schedule pilot negotiation
5	Confirm pilot project; secure vendor contracts
6	Prototype immersive pop-up concepts; document workflow
7	Execute pilot activation; collect audience insights
8	Publish case study; share media coverage
9	Evaluate pilot; gather sponsor feedback
10	Iterate speculative deck designs; expand outreach to additional houses
11	Target second potential pilot; test sponsor integration models
12	Review year 1 outcomes; update roadmap for Year 2 scaling

APPENDIX E – GTM Outreach Template / LinkedIn Content Outline

Channel	Content Type	Target Audience	Frequency	Purpose / KPI
LinkedIn	Thought leadership posts	Production house execs	2–3 posts/week	Engagement, pilot meetings scheduled
Instagram	Visual speculative decks	Industry creatives & fans	3–4 posts/week	Engagement, inbound inquiries
Email / Alumni	Personal outreach	Hult alumni + industry contacts	Ongoing	Introductions, referrals
Medium / Substack	Experiential cinema articles	Film & fan communities	1–2 posts/month	Newsletter subscriptions, inbound leads

APPENDIX F – Global Precedent Case Studies

Project	Location	Concept	Key Takeaways
Secret Cinema	UK	Immersive cinema events for major films	Narrative spatialisation drives engagement and repeat attendance
Meow Wolf	US	Immersive art installations combining storytelling & interactivity	Multi-sensory design and audience-led exploration increase brand loyalty
Dune: Part Two Activation	Global	Experiential fan pop-ups at select cities	Large-scale franchises benefit from hybrid offline/online engagement; media coverage amplifies reach
