1. CEILING HEIGHT / VERTICALITY

Abstract, creative processing

Meyers-Levy & Zhu (2007), Journal of Consumer Research

2. BLUE ENVIRONMENTS

Approach-motivated, creative cognition

Mehta & Zhu (2009), Science

3. NATURE EXPOSURE

Restored attentional capacity

Kaplan (1995), Journal of Environmental Psychology (Attention Restoration Theory)

4. AWE

Creative fluency, flexibility, elaboration

Chirico et al. (2018), Creativity Research Journal

5. FRAMING

Actual neural pleasantness, not just perception

Plassmann et al. (2008), PNAS

ETHOS
Grounded in peer-reviewed science and trusted research.

LOGOS
Every design choice is backed by cognitive and neurological evidence.

PATHOS
Spaces that make people feel seen, restored and inspired.

KAIROS
The right experience, in the right moment—for lasting impact.

Validating What We Don’t Know Yet, *Before It Goes to Rollout*

1. PARTICIPANTS

40–60 business travellers, randomly assigned

2. METHOD

Standard room vs. Creativity Suite (image set / VR walkthrough)

STUDY DESIGN

The A/B Comparison

STANDARD ROOM

VS

CREATIVITY SUITE

3. MEASURES

Eye-tracking, GSR, ECG, post-exposure survey

4. EMBEDDED TEST — FRAGRANCE

Isolated as its own variable inside the study

RIGOR
Tested before rollout, not assumed.

METHOD INTEGRITY
Randomized. Controlled. Triangulated.

NUDGE, NOT MANIPULATION
Disclosed. Opt-in. Guest-benefit first.

THE STANDARD
Doesn’t help the guest? Doesn’t ship.
