Double Diamond

Fuzzy Generic Problem

- People often don't know their limits
- Alcohol, social pressure, and environment mask early warning signs
- Lack of safety measures
- Risky situations in bars/events escalate before staff can respond
- Consumers need to feel comfortable to reach out for help

Discover

- No early detection tools
- Predictable risk peaks
- Social & psychological pressure
- Environment accelerates drinking
- Fragmented staff communication
- Business & atmosphere concerns
- Guests lack safe ways to ask for help

Define

- Staff cannot reliably identify early risk
- Guests lack discreet, socially acceptable ways to request help
- Intervention happens too late, when situations have escalated

Detailed problem

Bar staff are currently unable to identify and support guests who are becoming unsafe, uncomfortable, or unwell early enough because they rely on intuition and late-stage visible behaviour, lack shared and discreet tools to flag concerns or coordinate responses, and are constrained by the fear that intervening too soon will disrupt the atmosphere, embarrass guests, or harm business.

Develop

- Identify early behavioural and environmental warning signs
- Enable discreet, stigma-free help requests
- Frame intervention as hospitality, not control
- Improve coordination between staff roles
- Use space, lighting, and social cues to slow escalation

Deliver

- Discreet help buttons
- Calm recovery space

Fitting solution

- Discreet, guest-centred safety system
- Enables early, compassionate intervention
- Empowers guests without judgement
- Supports staff with clear, timely signals
- Preserves atmosphere while reducing risk

Stakeholder Map

Customers (Primary audience)

Persona

> "Most of the time, I can feel when something's off — but by the time it's obvious, it's already become a problem. I wish I had a way to step in earlier without embarrassing anyone or kiling the vibe."

Alex Morgan

Age: 29

Place of residence:
London, UK

Occupation (job, position, at a busy London bar

Mid-level income, shift-based work, peak hours late evenings and weekends.

Alex sitls in the middle:

Catsıral nidtiun, nytta piasums sstartive naricksssions, tuks us a- earpaise, obserment eapression urhen

Family & friends (hunstly, status, social ttime, lusers teme)

- Lives with a flatmate
- Active social life, understands nightlife culture from both sides
- Enjoys music events and social drinking but values boundaries
- Empathetic toward guests because they've "been there too"

Why this persona matters:

Alex represents staff who want to do the right thing but are trapped between:

- intuition vs. data
- care vs. confrontation
- safety vs. business pressure

Contrary behaviours & mindsets spectrum

Intuitive judgement →	Structured supppr⊂rt
Reactive intervention →	Preventive care
Business-first pressure →	Guest wellbeing focus

Alex sits in the middle: confident in experience, but aware intuition alone isn't enough in fast-paced, crowded environments.

Touchpoints of this persona with the topic

- Serving alcohol and monitoring guest behaviour ε ιx
- Deciding when to slow service or cut someone off
- Coordinating with security during peak hours
- Handling uncomfortable or escalated guest situations
- Responding to complaints or incidents after the fact
- Early, *exɛrch ysiontiprge, then* guests are already drunk
- Cutting someone off and triggerng confrontation
- Inconsistent responses between bar staff and security
- Feeling responsible for safety without proper tools
- Systems that protect atmosphere and safety

Annoys the persona

- Only noticing issues vhen guests are already drunk or distressed
- Cutting someone off and triggering confrontation
- Inconsistent responses between bar staff and security ıx
- Feeling responsible for safety without proper tools

Makes the life easier

- Early, discreet signals that a guest may need support
- Shared visibility across staff roles
- Clear, non-confrontational ways to help guests
- Interventions framed as care, not control
- Systems that protect atmosphere and safety

Empathetic · Experienced · Overstretched · Intuitive · Cautious . Guest focused

Customers (secondary audience)

Persona — The Attendee Who Drinks Under Social Pressure

> **I Just feel like everyone else is** drinking so much and if I don't join in, I'll end up looking boring or out of place.

Emma
Age: 24

Context: International or first-year student trying to build friendships and integrate into new scial circles. Frequently attends events with people they don't know very well. Drinks mainly to keep up with the group dynamic rather than by personal choice.

Event Behaviour

- Accepts shots or drinks even when they don't want, simply to avoid seeming "boring" or "anti-social".
- Matches the drinking pace of the group to avoid standing out.
- Downplays signs of discomfort or intoxication to maintain a socially confident image.
- Feels guilty or awkward refusing alcohol, especially during rounds or drinking games.
- Only realises they, are unwell, or overwhelmed once symptoms are aready strong (dizziness, anxiety, nausea).
- Rarely asks for help because they worry it will negatively affect how others sez them

Motivations

- Wants to belong, bond quickly, and avoid being excluded from groups.
- Believes drinking is an expected part of social life and fears *disppoinkinte*
- Values group harmony and tries not to disrupt the mood.

Pain Points Connected

- Struggles to set boundaries in environments. where alcohol is the centre of social interaction.
- Feels judged when slowing down or refusing drinks.
- No discreet way to signal she need a break or feel unsafe.

Why This Persona Matters

- **Hydration tickets** serve as a socially neutral, friendly nudge that allows the attendee to slow down without looking like they're "ruinn" ing the fuh"."
- **Help buttons** give them a discreet channel to ask for assistance if social pressure becomes overwhelming or if someone in the group pushes them too far.
- **Visible water stations** let them take breaks without having to justify their choice to others.

Why This Persona Matters

- **Hydration tickets** serve as a socially neutral, friendly nudge that allows the attendee to slow down without looking like they're "ruiining the fun"
- **Help buttons** give them a discreet channel to ask for assistance if social pressure becomes overwhelming or
- **Visible water stations** let them take breaks without making it cbxioue to others.

Fuxblau

Persona — The Attendee Who Becomes Physically Unwell

> **I feel really dizzy.** How can I quietly get out of here without anyone noticing?

Sacha
Age: 23

Context: Occasional drinker who participates in university events but lacks experience with alcohol tolerance. Often drinks to keep up with the group, not because they desire the alcohol itself.

Event Behaviour

- Drinks at a faster pace than intended because they follow social cues rather than personal limits.
- Becomes dizzy, nauseous, or shaky without realising early signs of overconsumption.
- Retains discomfort internally until symptoms become severe (e.g, fainting, vomiting).
- Avoids walking to the bar or approaching staff because they fear embarrassment.
- Is often found sitting alone, pale, overwhelmed, or trying to quietly exit the venue.

Personality

- Polite, reserved in unfamiliar environments, and extremely reluctant to "cause trouble." Easily overwhelmed by loud music, heat, and crowds.

Motivations

- Wants to enjoy events without standing out or attracting unwanted attention.
- Seeks reassurance and safety but does not want to publicy signal culnerablity.
- Prefers solutions that allow discreet communication or supportive staff intervention.

Pain Points Connected

- Cannot ask for help openly due to embarrassment or fear of judgement.
- No visble, non-intrusive support system when starting to feel dizzy or faint.
- Limited accees to water in crowded or dimly lit areas prolengs dehydration.
- No calm space to recover without being surrounded by nolse or people.

Why This Persona Matters

- **Help buttons** are essential for this persona, an immediate, discreet way to reach staff while seated or loaning on a surface.
- **Water station** reduces dehydration risks and gives them en easy, non-judgmental way to slow their drinking.
- **Calm room** provides a safe place to recover, reducing nicidents of fainting or vomiting on the main floor.

Why This Persona Matters

- **Help buttons** are essential for this persona, on an immediate, discreet way to reach staff while ŝes-ted or leaning on a surface.
- **Water station** reduces dehydration risks and gives them an easy, non-judgmental way to slow their drinking.
- **Calm room** provides a safe place to recover, reducing incidents of fainting or vomiting on the main floor.

- **Hydration tickets** give staff a socially occeptable way to encourage breaks without embortassing the attendee.

Persona — The Attendee Who Escalates into Aggressive Behaviour

> **Who the hell does that guy think he is?** I'm not backing down if he starts something...

Alex
Age: 26

Context: Regularly attends student parties, club nights, and group celebrations. Drinks more heavily in social settings, especially when surrounded by close friends. Often arrives at events already stressed (academic pressure, personal issues), which increases reaactivity to alcohol.

Event Behaviour

- Drinks quickly at the start of the night to "loosen up", making effects apoear faster.
- Engages in competitive drinking with friends (shots, rounds, challenges).
- Becomes louder, more physical, and less tolerant of crowded spaces as intoxication increases.
- Small incidents, accidental bumps, long queues, misunderstandings, can trigger sudden aggression.
- Rarely asks staff for help; tends to deny being too drunk or out of control.
- Once escalated, may argue with other guests or challenge staff decisions (refusing to stop service).

Motivations

- Wants to feel confident, respected, and in control in social environments.
- Drinks to reduce stress and boost social presence.
- Values group loyalty and often reacts defensively to proeet friends.

Pain Points Connected

- Lack of early detection: Staff often notice escalation late, when aggression is already visible.
- Crowded or poorly lit areas heighten frustration and trigger confrontations.
- No subtle staff communication tool.s: Makes coordinated intervention harder, especially acress multiple bar stations.

Why This Persona Matters

- **Buttons and colour-coded alerts** allow staff to detect early warning signs and coordinate quickly before a fight begins.
- **Calm, low-tight zone** offers a de-escalation space where staff can redirect the attendee before conflict escalates: [illegible] cab
- **Hydration tickets** encourage pacing early in the event, reducing the likellhood of impulsive, alcohol-driven aggression.

Why This Persona Matters

- **Buttons** and **colour-coded alerts** alow staff to detect early warning signs and coordinate quickly before a fight begins.
- **Calm, low-tight zone** offers a de-escalation space where staff can redirect the attendee before conflict escalates: [illegible].
- **Hydration tickets** encourage pacing early in the event, reducing the likellhood of impulsive, alcohol driven aggression.

CUSTOMER JOURNEY MAP SCENARIO 1: CURRENT BAR SETTING (NO PROACTIVE SYSTEM)

Stage 1 – Arrival & Anticipation

Customer

- Arrives excited, social, slightly nervous.
- Alcohol seen as part of fitting in and relaxing.
- No guidance or awareness of limits.

Staff

- Greet customers but have no insight into emotional state or intentions.
- Rely on experience and surface-level observation.

Pain Point

- Early vulnerabilities are invisible.

Stage 2 – Early Drinking & Social Pressure

Customer

- Drinks to match the pace of friends or surrounding crowd.
- Peer pressure and desire to belong increase consumption.
- Feels confident and included.

Staff

- Bar is busy; lighting and noise make monitoring difficult.
- Behaviour still appears “normal.”

Pain Point

- Psychological and social escalation begins unnoticed.

Stage 3 – Acceleration & Environmental Triggers

Customer

- Drinks faster due to loud music, queues, group shots.
- Decision-making starts to decline.
- Doesn’t realise they’re approaching their limit.

Staff

- No shared system to track pace or behaviour.
- Different bartenders serve same guest unknowingly.

Pain Point

- No early warning signals; reliance on intuition only.

Stage 4 – Escalation

Customer

- Becomes uncomfortable, dizzy, or overly confident.
- Feels embarrassed to ask for help.
- Fear of being judged or removed.

Staff

- Notice only once behaviour becomes disruptive or visible.
- Intervention feels abrupt (cut-off, removal, security).

Pain Point

- Intervention happens too late and feels punitive.

Stage 5 – Crisis Response

Customer

- Feels singled out, confused, or unsafe.
- May rely on strangers to get home.
- Experience turns negative.

Staff

- Must react quickly under pressure.
- Risk of conflict, complaints, or liability.

Pain Point

- Stressful, reactive management for everyone.

Stage 6 – Aftermath

Customer

- Leaves with embarrassment or unsafe memories.
- Less likely to return.

Staff / Venue

- Reputation risk.
- No data captured to improve future events.

CUSTOMER JOURNEY MAP SCENARIO 2: FUTURE BAR SETTING (WITH HELP BUTTONS & EARLY NOTIFICATION SYSTEM)

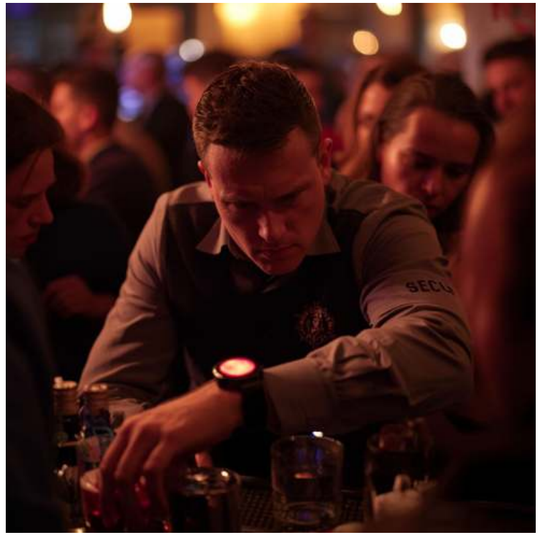

Stage 1 – Arrival & Atmosphere
The guest arrives at the bar and enters a lively, welcoming environment. Safety messaging and subtle visual cues signal that support is available if needed, without disrupting the social vibe.

Stage 2 – Social Drinking Begins
The guest starts drinking with friends, feeling relaxed and included. Alcohol consumption increases gradually, influenced by music, lighting, and group dynamics, but remains socially enjoyable.

Stage 3 – Early Risk Detection
The guest begins to feel slightly overwhelmed or notices they are drinking faster than intended. Instead of waiting for things to worsen, they discreetly use a safety/help button accessible under the tables marked visibly on the table.

Stage 4 –Silent Alert to Staff
Staff receive a quiet, real-time notification indicating a guest may need support—without singling them out publicly or interrupting the group dynamic.

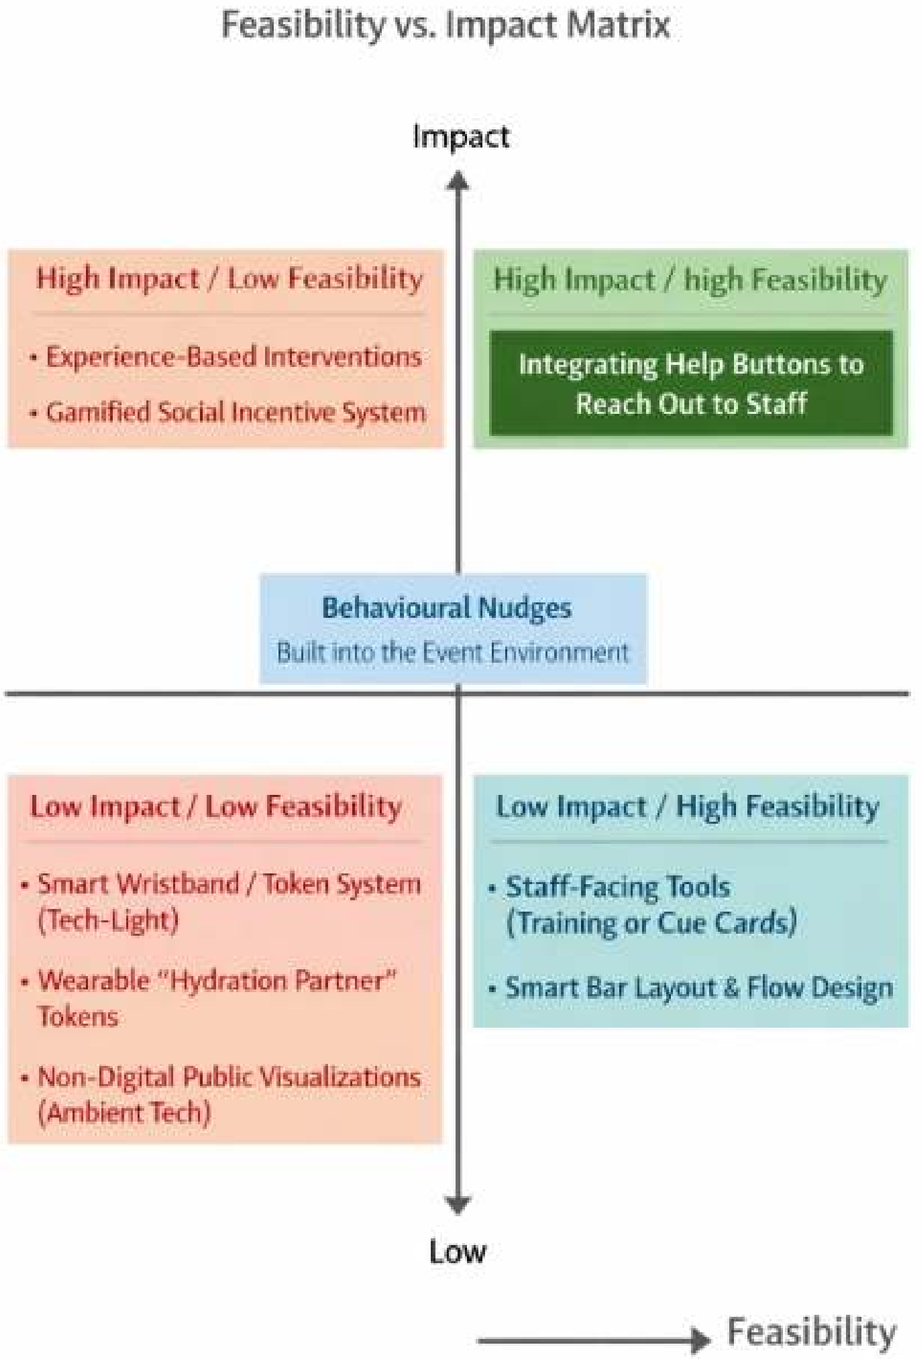

Stage 5 – Timely, Supportive Intervention
A staff member checks in naturally (offering water, food, a break, or a quieter space), framing the interaction as hospitality rather than control. The situation de-escalates before becoming disruptive or unsafe.

Stage 6 –Safe & Positive Outcome
The guest feels cared for rather than judged, remains safe, and either continues the night at a slower pace or leaves comfortably with support. Staff maintain control of the environment, and the venue preserves its atmosphere, safety, and reputation.

Feasibility vs Impact Matrix

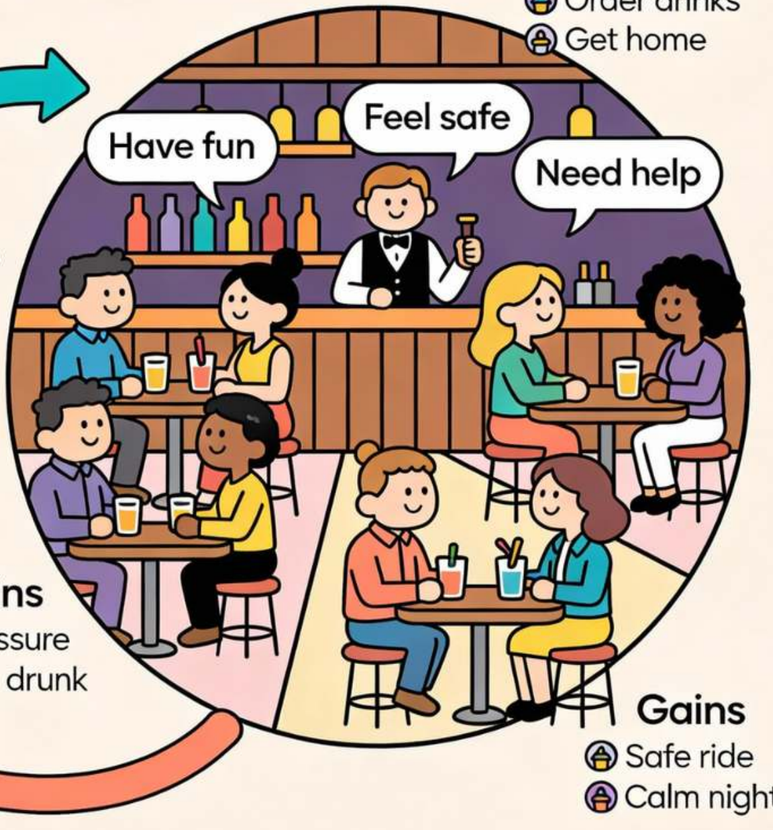

Embedding discreet, guest-led support transforms responsible drinking from reactive intervention to proactive care

S	C	A	M	P	E	R
Discreet help buttons replace uncomfortable verbal requests, while visual alerts replace staff-only judgment, enabling earlier and clearer support signals	The help buttons integrate with water stations, calm spaces, and staff screens to form a connected safety system embedded in the hospitality experience	The concept adapts familiar hospitality and healthcare tools (call buttons, colour alerts), making it intuitive and reducing training and adoption barriers	The system allows guests to signal different needs, while environmental changes like softer lighting and seating support relaxation and recovery	Beyond bars, the system can scale to festivals, universities, and social events where alcohol is present and early intervention matters	Invasive elements like drink counting, personal data collection, and public announcements are removed to avoid surveillance or judgment	Instead of reacting after escalation, guests proactively signal for help, shifting responsibility toward early care and shared safety
